Established 1887

Of Issue of Amnesty

By Carroll Kilpatrick

HICAGO, Assg. 19 (WP)—President Ford told the Veterans of ign Wars convention here today that he had ordered a review ie whole question of amnesty for desertion and draft-dodging to le 50,000 young men "to work their way back home." Without amouncing details of the new policy, he said that he said "to bind up the nation's wounds" and would throw "the it of my presidency into the scales of justice on the side of

ncy." The President said that, while he was rejecting blanket amnesty, he also was rejecting revenge and would act "promptly, fairly and firmly in the same spirit that guided Abraham Lincolu and Harry Truman."

In a dramatic and unexpected break with former President Richard Nixon's assertion that he would "never" approve amnesty the new President announced that he had directed Attorney General William Saxbe and Secretary of Defense James Schleto propose recommendations for a new policy before

Sept. I.
Mr. Ford said that the review would cover the status of 50,000 men convicted, charged or still sought for "offenses loosely described as desertion and draft-

"I will then decide how best to deal with the different kinds of cases," Mr. Ford said. "There are differences. Decisions of my administration will make any future penalties fit the serious. ness of the individual's mistakes." Stamped Silence

The 3,900 VFW members and in stunned silence as the President read his statement on amnesty. It had not been part of the advance text distributed to newsmen aboard the plane coming here from Washington

Members of the audience did not react critically but listened semberly and noncommitally to the President's sharp break with Nixon administration policy on one of the most delicate issues

Referring to the Americans under investigation for violations of the Selective Serring Act or the Code of Military Justice during the Victuam war, Mr. Ford called them "cr.smattles still abroad or absent without leave from the real America."

they want to work their way back," he said. "These young Americans should have a second chance to contribute their fair share to the rebuilding of peace among ourselves, and with all na-

More than 5,000 Vietnam war deserters and indicted draft-dodgers are living abroad, according to Defense and Justice Depart-

ment figures.
The Defense Department said that 2099 deserters were large" in 59 countries as of last Dec. 31, the most recent compiletion available. These are part of a total of 28,661 listed as deserted both in this country and abroad.

Living in Canada The Justice Department said that about 3,000 indicted draft evaders are living in Canada alone. In all, the department lists

4 100 under indictment. Appealing to VFW members for their help, the President said: "I ask all Americans who ever asked for goodness and mercy in their lives, who ever sought forgiveness for trespasses, to join in rehabilitating all the casualties

The President's announcement that he would nominate Richard Roudebush, former Republican member of Congress from Indiana and deputy administrator of the Veterans Administration, as the

ATTACK AT EMBASSY—Smoke pouring from cars set aftre yesterday by demonstrators who attacked the U.S. Embassy in Nicosia. The U.S. ambassador was killed in the attack.

CALLS AT EMBASSY—Cypriot President Glafkos Clerides arriving at the U.S. Embassy in Nicosia after learning that the ambassador had been killed by demonstrators. He was wearing a mask to protect himself from tear gas that was used in crowd control.

Between Kissinger, Schlesinger

Congress Urged to Decide on Arms Policy

By Murrey Marder WASHINGTON, Aug. 19 (WP).

-Congress must choose between the "divergent strategic arms policies" of Secretary of State Henry Kissinger and Secretary of Defense James Schlesinger, Sen. Frank Church, D-Idaho, said toof all tragic conflicts that are

The "debilitating ambivalence of [former] President [Richard] Nixon" in deciding which secretary's strategy should prevail leaves President Ford with one of the most critical choices of his administration Sen. Church said. troubled agency's new director The decision is at the core of (Continued on Page 3, Col. 4)

This choice will determine if there will be "a continuing arms race masked behind a façade of cosmetic agreements," with costs that will cripple both superpowers, Sen. Church said, or a halt to the nuclear arms spiral that will facilitate the serious

Responsibility to Choose "Great as the President's responsibility is," Sen. Church said, "it is not his alone" to decide. "Congress, too, has the responsi-bility to choose," he said, and also "the power to enforce its choice through binding legislation."

pursuit of detente.

Sen. Church was bluntly presenting, in a major speech to the Senate, the Kissinger-Schlesinger difference that preoccupies U.S. strategists. The controversy was scheduled for airing in somewhat more muted form in a debate about U.S.-Soviet détente policy that Mr. Kissinger was due to

both postponed and are now being rescheduled. The commit-Sen Church supports the Kis-

singer concept expressed at the conclusion of the last American-Soviet summit conference in Moscow July 3: "Both sides have to convince their military establishments of the benefits of restraint, and that is not a thought that comes naturally to military men on either side."

Mr. Kissinger and Mr. Schlesinger publicly have avoided ex-pressing their differences more personally than that. On both sides, however, it is privately ac-

future American-Soviet detente knowledged that they have basically different concepts about U.S.-Soviet policy that transcend levels of nuclear weapons and reach issues of fundamental policy toward the Soviet Union, Each has said he welcomes a national debate. Sen, Church gave his version of their divergences in outlook from a pro-Kissinger viewooint.

> Detente means 'a lowering of tension." Sen. Church said, and not that the United States and the Soviet Union are "partners for peace," because the two nations "are not friends, we are

> The test of détente, therefore, he said, is "whether the rivalry has been restrained by the danger of confrontation." Sen Church said his answer is "yes."

The Moscow summit meeting Sen. Church said, showed that Soviet Communist party leader Leonid Brezhnev "is as much under pressure from his military hardliners as Secretary Kissinger from military and civilian hardliners in the Pentagon,"

"The choice, therefore, is large-(Continued on Page 2, Col. 5)

EOKA-B Terrorists Attack Embassy

NICOSIA, Aug. 19 (UPI).— Greek Cypriot gunmen shot and killed U.S. Ambassador Rodger Davies today during an attack on the American Embassy by 700 demonstrators protesting the U.S. failure to halt the Turkish invasion of Cyprus,

The gumnen, dressed in the uniforms of a Greek Cypriot guerrilla organization, fought their way to the embassy's front porch and fired automatic rifles into the entrance and windows, witnesses said. One bullet hit Mr. Davies in the chest,

Antoinette Varnara, 32, a Greek-Cypriot secretary at the embassy, died in the shooting. But earlier reports that a U.S. Marine guard had been killed were untrue, an embassy spokesman said. "A burst of bullets smashed

through the shutters of the ambassador's office, through two doorways and into a corridor where the ambassador and his staff had taken refuge," embassy spokesman David Grimland said. It was pure bad luck the ambassador was hit," Crowd of 1,500

About 1,500 demonstrators marched toward the embassy but only 700 of them managed to

ze through a narrow side street to get to the building. Mr. Davies's office was on the second floor of the four-story building. Its sand-colored walls and green shutters were pocked with bullet holes after the

The embassy staff burned all

Rodger Davies

said. He refused to disclose actails of documents destroyed or say whether the move meant the embassy would be closed. A Career Diplomat

Mr. Davies, a 53-year-old career diplomat from Berkeley, Calif., took up his post two months ago. A former deputy assistant secretary of state for Near Eastern and South Asian affairs, he was sworn in as ambassador to Cy-prus May 14 but did not come to Nicosia until early July, His wife

while on overseas duty. John Mein was killed during a 1968 kidnap attempt in Guatemala and Cleo Noel was shot by Palestinian terrorists in Khartoum, the Sudan, in March, 1973,

The demonstrators through a line of Greek Cypriot policemen who had tried to hold . They carried banners reading "Murderers, Your Mask Has Fallen" and "NATO Murderers of

Cyprus. They hauled down the American flag and burned it, set afire 10 automobiles in the embassy compound and burned an effigy of U.S. Secretary of State Henry

In the confusion, the gunmen opened fire, some from the street, some from the embassy porch atter scaling the feace surrounding the compound. They were dressed in what witnesses said were the para-military uniform of EOKA-B, the Cyprior guerfilla organization that has fought for union of Cyprus with Greece.

In the war itself, Turkish tanks moved south of Nicosia today in a drive to isolate the capital by trying to cut the last road open to the sea—the Limassol highway. Turkish armored columns drove to the village of Louroujina, three

miles east of the highway. A Turkish battalion, backed by dozen tanks, was reported on the Larraca road within striking distance of Nicosia, opposed by

Mr. Schlesinger countered the same day: "There is no problem with the Department of Defense, I think we have firm civilian controi in this country." he said.

Anti-Coyote Study Using Sheep Fails to Impress Hungry Dogs

SPOKANE, Wash., Aug. 19 (AP).-A state-funded study on ways to train coyotes not to eat sheep was suspended here this weekend when animals used in the project were eaten by dogs. Dr. Carl Gustavson, an assistant professor of psychology at Eastern Washington State College, said eight sheep being held in pens were eaten by a dog pack. The dogs had jumped a 12-foot fence to reach the sheep.

Dr. Gustavson heads the \$50,000 program, funded by the

Washington Department of Agriculture, to develop a method of making coyotes temporarily ill after they eat chemically doctored lamb-meat patties. This is supposed to discourage the coyotes from eating

"It's tronte; here we are, trying to teach coyotes not to kill shrep, and our sheep are killed by dogs," he said. Dr. Gustavson said he would transfer the project to an-

other location where the sheep would be safer.

U.S. Navy Bars Visit by Soviet Liner to Guam

HONOLULU, Aug. 19 (UPI).— The Soviet cruise ship Feodor Chaliapin carrying 700 Japanese businessmen and tourists, was barred last week from Guam by the Navy but docked later at Saipan, in the U.S. Trust Territorles, a Pacific Command spokesman said yesterday.

The spokesman said the order came from the State Department. But a State Department spokesman in Washington sald he knew nothing about the incident. Navy sources believed it was

the first time that a Russian commercial ship had been barred from entering an American harbor since U.S.-Soviet relations began to improve. The ship had sailed from

Yokohama last Monday and was due to stop over at Guam last week the first port on a threeweek cruise. It had been chartered by the Leisure Development Center of Japan.

Recently, Soviet ships have stopped frequently in U.S. Pacific ports. The Leonid Sobinov visited Honolulu for three days beginning June 9. Before détente. the only Russian ships allowed in Honolulu harbor were those needing emergency repairs. They were kept under observation by the U.S. Coast Guard. Only normal customs security was maintained when the Leonid Sobinor docked in Hawaii.

American's Wife Is Kept in Russia

MOSCOW, Aug. 19 (UPI),— An American exchange professor who married a Russian woman in May said today that Soviet authorities have refused permission for her to leave the country with him.

Prof. Woodford McClellan, 40, who teaches Russian history at the University of Viriginia in Charlottesville, said authorities at the Soviet visa office told his wife she could not leave for at least a year, because she had engaged in work involving state secrets.

He said his wife, the former Irina Igorevna Astakhova, is an English teacher who has never encaged in secret work. He said he planned to contact American government officials and the United Nations Commission on Human Rights to seek help in getting his wife out of the coun-

Meanwhile, Portugal raised gasoline and bread prices as part of what Premier Gonçalves called a new economic program of "sacrifice and austerity."

The government also raised cereal and condiment prices and kept top salaries frozen at 7,500 escudos (\$300) a month.

19 IRA Chiefs In Jailbreak Elude Hunters

DUBLIN. Aug. 19 (UPI).-The 19 chieftains of the outlawed Irish Republican Army who yesterday blasted their way out of the Irish Republic's top-security jail appeared today to have made good their escape despite one of the most intensive manhunts in this country's history.

No trace of the fugitives was found by thousands of police and Irish Army troops combing the countryside north and south of the border with Northern Ireland today. The searchers were aided by helicopters and spotter

At a barrier near the Ulster border. Irish Army soldiers this morning wounded Andrew Magee. 36, who once was interned in Long Kesh prison camp in Northern Ireland. He tried to crash the barrier, although he was not one of the 19 who used smuggled dynamite to escape the Portiaoise maximum-security prisor, 50 miles southwest of here. in the latest spectacular jailbreak by guerrillas of the IRA.

Nor were two of the IRA's best known leaders among those who from Portlaoise vesterday. Police said that Joe Cahill, once the IRA Provisional wing's chief of staff, and Martin McGuinness. who headed an IRA bombing campaign in Londonderry, Ulster, were still in Portlaoise. The government said: "A larger

force of prisoners who were following the escapees were fired upon by the military and were halted. No prisoners were struck by gunfire."
Nevertheless, security officials

here said that the breakout was bound to be a tremendous morale booster" to the guerrilla organization, which seeks to liberate Protestant-dominated Northern Ireland from British rule and unite it with the Catholic-dominated republic. A Provisional IRA source here

said that republicans were jubilant over the escape-"the thing we need to keep up morale in the occupied six counties" of Northern Ireland.

The Irish Republic's Cabinet met today in emergency session to discuss the jailbreak.

Japan named Mun Se Kwang, has been quoted by government prosecutors as confessing that North Korean agents financed and encouraged him.

Official announcements and the controlled press continue to stress the anti-Communist theme in discussing the killing. A strong anti-Japanese aspect is also increasingly evident in public statements by such prominent citizens as the president of the Ko-rean Bar Association and director of the Writers and Poets Association. Japan is blamed for permitting pro-North Korean political activity and for unwittingly issuing a passport to the assassin, who applied for it under

In an effort to ease Japanese-Korean tension, Japanese Premier Kakuei Tanaka came here for the funeral today. He later paid a brief condolence call on the widowed President.

Mr. Park did not attend the

funeral or burial service for his wife. Official announcements said that this was in keeping with Korean custom regarding a head of state. But many Koreans were unaware of such a custom. formed sources suggested that the real reason for Mr. Park's absence was security and reported that the President had been urged by his advisers not to attend. While the President himself was absent, the funeral was notable for the participation and presence of a wide spectrum of Korean leaders. Park Sun Chon, retired leader of the major opposition political party, was among the speakers. Stephen Cardinal Kim, who has been increasingly at odds with the government in recent weeks, said prayers at the funeral as did a Presbyterian minister, the Rev. Han Kyong Jik, one of the

most prestigious Protestant leaders here. Buddhist prayers by 10 monks were also said for Mrs. Park, who was a devoted Buddhist.

Royal Gate

After the funeral service in front of the Capitol, still pocked by shell scars from the North-South war which ended 21 years ago, the flower-laden hearse made its way through a ceremonial gate used by Korean royalty since the 14th century.

Outside the gate, more than a million Koreans crowded the sidewalks, public squares and roadsides along the route to the burial place in the National Cemetery. Mrs. Park was widely loved and many spectators along the road were weeping.

The National Cemetery is mostly for heroes and military leaders and Mrs. Park was buried in a plot previously set aside for a

Israel Port Seen For U.S. Fleet

TEL AVIV. Aug. 19 (UPI).-Reserve Maj Gen, Haim Herzog, former chief of military intelligence, today proposed that Isvince the United States to move the Sixth Fleet's home port from Greece to Israel.

Gen. Herzog, Israel's leading military commentator, said the United States might be ousted from both Greece and Turkey. So far, the fleet is still in Greece Gen. Herzog made his comments 24 hours after the newspaper Yedioth Ahronoth proposed that the fleet should establish its home base at Haifa, the largest Israeli port.

Gen. Herzog said Israel did not expect the Americans to ask for home port facilities but said that should not prevent Israel from proposing it because of the October war and the Soviet weapons buildup in Arab countries.

2 Executed in Russia

MOSCOW, Aug. 19 (UPI) .--Two men have been executed in Azerbaijan for plundering state funds, according to the Baku newspaper Bakinskii Rabochoo.

Pentagon Criticized by Report On M-16 Rifle Used in Vietnam

WASHINGTON, Aug. 19 (AP). -Seven years after Vietnam battlefield complaints about the M-16 rifle, a civilian advisory committee has said that Pentagon officials of that era ordered its production "in spite of known deficiencies" in the

The committee's finding in effect refuted Army and Marine Corps contentions in 1967 that M-16s jammed in combat principally because riflemen were not maintaining the weapon properly.

"Major production decisions were made, particularly in the 1964-1955 era, in spite of known deliciencies in the M-16 which had previously been identified in testing." the Army's Materiel Acquisition Review Committee said in a new report.

It suggested that a major cause of difficulties was a "need for a very large quantity in a very

The committee, whose members were drawn from industry, universities, consulting firms and government agencies, named no decision-makers in its criticism. However, Robert McNamara, who was secretary of defense in January, 1966, told the House Defense Appropriations Subcommittee then that, after returning from Vietnam somewhat earlier. "I put on order a large quantity

of M-16s because I thought they would prove effective and that they would be needed." Mr. McNamara indicated that he had had to overcome military opposition to the M-16, saying, "I personally have been trying to

services of this country for three The Army had awarded its first contract for the lightweight

rifles in 1963, contracting for 104,000 of the weapons. Mr. McNamara's 1966 testimony also implied that U.S. generals fell into line during their

civilian chief's Vietnam trip. "All the commanders suddenly decided they wanted larger quantities." he testified. The M-16 problems were resolved in time, with changes in

design and ammunition power. The civilian advisory commit-

tee, after studying the Army's process of developing, testing and producing weapons and other materiel said: "The M-16 problems were not

so much a failure of testing but rather a slowness of 'the system' to correct deficiencies identified by testing," the committee said. It said that changes recently made by the Army "should reduce the chances that many of the problems associated with the M-16 rifle development program

cannot find any justification

tification and said it will only (Continued from Page 1) only three old tanks of the Greekadd to Greece's troubles. "Unholy actions such as this

led Cypriot National Guard. The advancing Turkish forces were said to have knocke ' out at least one tank during the night in the drive toward Louroujina, eight miles south of Nicosia, The Turks yesterday severed

the vital 21-mile-long road from Nicosia to the southeastern port of Larnaca leaving only the road to Limassol open. The capture of the 32-mile-long

Nicosia-Limassol road would isolate the capital. In the embassy attack, witnesses said United Nations armored personnel carriers driven by Canadian troops tried to reach

the embassy but were pelted by

stones and bottles thrown by the Eventually the carriers reached the rear entrance of the compound and evacuated the embassy staff.

Cyprus President Glafkos Clerides interrupted a news con-ference and rushed to the embassy. He wore a gas mask against the tear gas used by U.S. Marine guards against the

Mr. Clerides left the embassy at the time Mr. Davies's body was being brought out in a truck. Rushing to help, Mr. Clerides jumped onto the back of the vehicle as it careened out of the compound.

Heinous Crime'

"A helnous crime was carried out a while ago in Nicosia," Mr. Clerides said in announcing the death. "This crime climaxes the Cypriot tragedy at a moment when hopes appeared of a reversal of international opinion toward us. I condemn with abhorrence this atrocious crime which turns against Cyprus, and express my deep grief and sym-In Ankara, Premier Bulent

Ecevit expressed his shock and grief at the death of Ambassador Davies. He praised the United States for its position on the Cyprus crisis as he left an extraordinary session of parliament.

"The United States was objective and neutral in the Cyprus crisis," he said. "The Greeks who instigated the terrible incident knew this knew it very well. But still they acted as they did. The Greeks have committed the great mistake of trying to make others pay for their sins and errors... This is only one of the terrible incidents that have befallen the Turks in Cyprus day after day, year after year."

Earlier, Foreign Minister Turan Gunes said the killing of Am-bassador Davies helped to justify Turkey's military offensives on the island.

The Turkish government viewed the killing "with abhorrence," Mr. Gunes said. "But such brutalitics can always be expected to come from Greeks. This brutal murder once more shows to all the world how right Turks were in undertaking the military action on Cyprus."

Caramanlis Denounces Act In Athens, Premier Constantine Caramanlis denounced the shooting of Mr. Davies as without jus-

S. Vietnam Protests To Sweden Over Plan

SAIGON, Aug. 19 (Reuters) .-South Vietnam today protested a Swedish plan to grant new facilities to the information office in Stockholm of the Viet Cong's Provisional Revolutionary Government.

The statement said contacts between the Swedish government and the PRG constituted "interference" in the internal matters of the Republic of Vietnam." Sweden recognized the government in Saigon in 1958 and diplomatic relations between the two countries were established in

(Continued from Page 1) anti-U.S. demonstrations, including the violence that cost Ambassador Davies his life.

In Washington, the Pentagon disclosed that a second aircraft staged on July 20.

Mr. Kissinger added that the Greece and Britain-co-guarantors of Cyprus's independenceand the Turkish and Greek com-

Washington believes that the negotiators' lack of flexibility precipitated the breakdown last week of the Geneva talks and Turkey's subsequent renewal of its offensive on the island. Thus, the emphasis here today was on the need for a return to the conference table with a less intransigent attitude among the Turks

A reporter asked Mr. Kissinger whether the United States might halt military sid to Turkey cold war by thwarting Mr. retaliation for its Cyprus of-Brezhnev in trade, in the SALT fensive. The secretary responded that such an action had not been deemed advisable in the circumstances existing last week.

Extreme Case

all time." Mr. Kissinger added. James Schlesinger said that the Turkish actions in Cyprus would cause the United States to reexamine its military aid programs for Turkey. Stating his view of the U.S. position, he said: "I think that these questions will

have to be examined very seriously in the days and hours immediately ahead. "I would think that the spillover of the Turkish forces into

them to move into is a new elewill have to take cognizance of

imbalance of forces to utter meaninglessness, the delusion of supeversaries to adventure while alhigh-ranking officials dismiss this conception as nonsense pointing missile has ever been fired from 'Can't Solve All Problems'

ly, therefore, be regarded as having political value." "If we act on Mr. Schlesinger's concept of perceived equality." Sen. Church said, "it will mean staggering costs and the effective end to meaningful SALT nego-

Ser Church said that the Senate, by refusing on June 10 to delay funds for research and development in this field, "materially weakened Secretary Kissinger's hand at the Moscow summit, because the Soviets could only have read the Senate action as an endorsement of Secretary Schlesinger's approach as against Secretary Kissinger's détente policy."

This "also pointed up the debilitating ambivalence of President Nixon as between his two secretaries and their divergent strategic arms policies." Sen. Church

"The only way to improve upon

the balance of terror." the senator

said, "is by eliminating some of the instruments of terror. With Sen, Church opening up the Kissinger-Schlesinger differences on the Senate floor, those who support Mr. Schleringer's views are certain to respond.

Set for Talks On Pullback

The United States, he said at the meeting with reporters, had avoided making any public statement of its position because it had hoped that the Geneva negotiations would lead to a peaceful settlement on the island. He said that the United States had communicated with Ankara many times to try to head off the invasion which Turkey ultimately

United States would have prefer-red greater flexibility from all sides at the deadlocked Geneva negotiations involving Turkey, munities on the island

and Greeks.

Such a cutoff of aid to a NATO ally, he said, was a step that Washington would take only in extreme circumstances, "which have not arisen and which it does not foresee." "We have not ruled it out for

Monetary Policy

Even as a program of jobs on the public payroll for some of the memployed might make politically possible the long maintenance a tight-budget policy, attempts to deal with the worst effects of a tight-money policy would simi-larly permit prolongation of cred-it restraint.

One of the most serious effects of the light-money policy has been the near-disappearance of money to finance mortgages et interest rates home buyers fee. able to pay. The Pederal Reserve Board (which is not under administration control, but which prefers to get along with the administration in power when it can) has already reputted one proposal to deal with this problem; That was a plan which would have required legislation to use the Federal Reserve's regulatory powers to make it more attractive for banks to lend money for home building and "desirable" uses, than for other speculation in foreign currencies or other "less desirable" uses. Some other version of the idea. is likely to be proposed again, however, and to achieve the support of the Ford administration it seems at all reasonable.

The nation's experience with wage and price controls under the Nixon administration has led many in Congress and most of the American people to believe that controls can never work

Controls

There are reasons to believe that that conclusion is too sweeping. Among economists, there is widespread agreement that the on-and-off controls policies of the Nixon administration made inflation worse than it would have been under consistent controls, on the one hand, or under no controls at all, on the other,

In addition, Congress and the public have largely forgotten that the controls did appear to work in the early stages in 1971 and 1972, when there was slack in the econ omy. There is again slack now.

However, it is clear that Congress is no readier than the Ford administration to reimpose controis now. Assuming that Congress does not give the President any new authority to alter wage and price decisions in the private economy, it remains to be seen what the effects will be of Mr. Ford's obvious intent to use "jawboming"--public criticism-such as that he directed last week at General Motors for announcing 10 per cent price rises in its 1975

al Miners in U.S. Launch ay 'Memorial' Work Halt

LESTON, W. Va., Aug. 19 Coal miners began a five-k stoppage today at the hat produce more than warters of the nation's he stoppage will deplete low stockpiles at steel si power plants.

leaders are calling it a al period, a device in the United Mine Workers intended to allow the mourning periods—with-for those killed in mine s and who died of hing

windling Stockpiles

teel, the nation's largest of steel and a heavy sumer, reported last week stockpiles were down to supply. Jones & Laughlin. inks sixth, said its stockre "aiready too low for ation levels required by ig steel market."

ational Coal Association's gures show that, as of efore the UMW's annual vacation period, electric nad a 92-day supply. The e Valley Authority. fW mines, reported lastit some of its generating were down to as little as of coal.

The stoppage affected about 120,000 UMW members and closed about 1200 underground and surface mines in about a dozen states. It will cost the nation about nine million tons of coal, according to estimates by the Bituminous Coal Operators' Association, the industry group that nerotiates with the UMW, and will cost miners \$25 million in

A side issue but easily the most volatile one—is a firm UMW drive to establish a union heachhead in eastern Kentucky with a strike against the Brookside Mining Co., a subsidiary of the Duke Power Co.

Negotistions for a contra

there are deadlocked and the yearlong strike has been marked by sporadic incidents of violence. Because it would be considered an illegal secondary boycott, the union cannot openly describe the shutdown as putting pressure on the coal industry to support its

drive at Brookside While the effect on stockpiles will give the union an obvious advantage during the still pending contract talks, its openly stated purpose is to dramatize the unsafeness of the mines. UMW president Arnold Miller said that more than 100,000 coal miners have died on the job

during this century. But Mr. Miller's statement also said that the shutdown would commemorate "those miners who are victims of company violence designed to prevent them from winning protection of a United Mine Workers contract."

Lobbyists Fill Ford's Circle Of Family, Personal Friends

By Michael C. Jensen

NEW YORK, Aug. 19 (NYT). -Several of Washington's most powerful corporate lobbyists are among President Ford's friends. some of whom are helping shape his administration during the transitional period.

Several have close ties with his family and have taken vacations with the Fords.

One, Rodney Markley, Ford Motor's chief Washington lobwhen he learned that Mr. Ford was to be sworn in. He boarded a plane in Paris and rushed back to Washington but arrived too late for the swearing-in. joined the Fords later that evening at their home in suburban Virginia for a dinner gathering. Another friend is Brace Har-

low. Procter & Gamble's chief Washington representative, who for years has moved easily in and out of government and has advised a succession of Presidents. William Whyte, vicepresident of the United States Steel Corp., and its top man in

Washington, is also a friend. Two other important business professional friends are from Mr. Ford's hometown of Grand Rapids, Mich., and already are working at the White House. They are Philip Buchen, Mr. Ford's former law partner who last week was named counsel to the President, and William Seldman an accounting-firm executive who is assisting in the Pres-

ident's economic planning.
Mr. Whyte, Mr. Markley and the President have often golfed together at the Burning Tree Chib. Their wives and children are friendly. For example, Mr. Whyte says his younger son has dated Mr. Ford's daughter and their families have vacationed

Mr. Ford's accession to the presidency has not interrupted their relationship, Last Monday, Mr. Harlow, Mr. Whyte and Mr. Markley joined a group of other friends for drinks and a late buffet at the Fords' house after Mr. Ford had delivered his address to a joint session of Con-

In subtle ways, of course, their acquaintanceship has been altered Now suddenly, the man whom they have known for 20 or 25 years as "Jerry" has become "Mr. President. Mr. Markley said his first dindeclared. "I will not hesitate to use the veto to control inflation-Appealing to Congress to give

a bill he could sign, the President said he was open to "conciliation and compromise." The House bill provided for a 13 per cent increase in education benefits and the Senate bill for 18

per cent. But the House-Senate Conference Committee, now working on the bill, raised the benefits to about 23 per cent. Aides said that the President would accept an 18 per cent or

19 per cent boost based on the cost-of-living increase of that amount since the last increase. In his speech to the VFW and in a brief speech after landing at O'Hare International Airport.

Mr. Ford stressed the need for

Let of Work to De

We have a lot of work to do," he said at the airport. "That includes me, as well as you, and our fellow Americans. We are going to do that work and we are going to accomplish what has to be done, both at home and abroad."

"It will take a little belttightening and sacrificing," he

In the VFW address, the first outside Washington since he becareer began in 1949, has had more exposure to Washington came President 10 days ago. Mr. Ford promised better operation of the Veterans Administration to avoid "arrogance or ference to any individual."

"I don't like red tape." he said and added, in a reference to the Nixon administration's difficulties with taped conversations: "As a matter of fact I don't like any kind of tapes. Drove From Airport

The President drove into Chicago from the airport instead of using a helicopter, which recent presidents often used to avoid

the long drive. As Mr. Ford neared his destination, he was greeted by several thousand angry demonstrators crowded on sidewalk across from the hotel where the VFW convened. They shouted denunciations of American policy toward Cyprus and called Mr. Kissinger a "killer."

When the President's plane landed at O'Hare, several hundred persons held placards proclaiming Welcome President Ford," but as Mr. and Mrs. Ford emerged from the plane, a luckless an-nouncer intoned over a public address system: "The President of the United States and Mrs. Nixon.

On the flight home from Chicago, Mr. Ford told reporters that he had "been a little apprehensive" about his choice of audiences for announcing the controversial policy change. He had decided, he said, that

the right audience for such a pronouncement "would be an audience that might be difficult rather than some hand-picked' group.

He later said that since he became President he had talked three of his four children about softening the anti-amnesty policy of Mr. Nixon and that all were favorable. The subject was first brought up, he said, by several members of his cabinet and his staff who told him "at some point we have to do something about this"

By Walter Sullivan

NYT: -An on-the-spot study of the Rift Valley where the world's crust, in the mid-Atlantic, is being torn apart at the seams, has indicated that, whereas the earth's crust beneath a typical ocean floor is several miles thick, inder that valley it is a thin,

frequently perforated skin. Only a few dozen yards below the floor of the valley that bi-sects the Atlantic from the Arctic to the farthest South Atlantic, several participants in research dives believe, lies molten lava ready to erupt at any time.

The dives, conducted as part of a French-American project, are widely considered a landmark in geology. The process that has now been viewed at first hand is beheved to have produced more than half the earth's rigid surface. Along the mid-ocean ridges it has manufactured the sea floor that now paves all the deep ocean basins.

The project is known as FAMOUS, acronym for French-American Mid-Ocean Undersea

Important Discovery

One of its most important discoveries, made by geologists rid-ing the American submarine Alin, has been evidence that the ocean floor is being pulled apart by forces acting elsewhere, rather than being forced apart along its crecline—as originally believed -by the intrusion of lava into the

r edian valley. This was indicated by numerous rifts in the valley floor, the major ones parallel to the valley itself. No such features had been evident in photographs taken by cameras previously lowered from research ships. The close-up observations revealed no compressional fea-tures in the rift, as would be expected if it were being forced open there,

The only signs of compression were the east-west canyons. where the north-south median valley has been offset to the east

So far, close to a dozen seclogists and volcanologists have spent a cumulative total of nine days on the ocean bottom exploring the median valley and the offset zones,

Pillows and Toothpaste The presence of molten lava close beneath the floor of the median valley was indicated by a variety of formations indicating that lava frequently bubbles up, particularly along the valler centerline These formations peculiar to submarine eruptions, bave been assigned a variety of names:

pillows, trapdoors, Coustcaus and toothpaste formations. The latter occur where lava has been forced out through a hole in a steep wall and sags down the wall like squeezed toothpaste. The bulbous features known as pillows are well-known products of underwater eruptions. Some

sighted in the valley were huge. Dr. Tjeerd Van Andel of Ore gon State University described them as 12 feet long, "exactly like baked potatoes with a crack on top and sour cream coming out," Elongated forms have been named Cousteaus, after the wellknown French oceanographer,

Jacoues-Yves Consteau.

Trapdoors have been identified and so named in the final dives of recent days. They are pillows whose tops have been lifted off by a second eruption, forming a mushroom cap elevated by a stem of newly extruded lava.

A Field of Trandoors Dr. Robert Ballard of Woods Hole Oceanographic Institution

in Massachusetts reported gliding over a great field of such trap-"You expected to see a pair of eyes peering out of each one." he commented. Dr. Wilfred Bryan. a Woods Hole geologist, likened the valley floor, with its manifestations of lava at shallow depth, to the crust that covers the lava lakes

of Kilauea Volcano in Hawaii. It was evident the geologists said, that current volcanic eruptions are largely—if not entirely -confined to a zone within about 500 feet to either side of the valley center line. Only there were the features freshly formed. This bears on the debate as to why this zone of eruption is a valley instead of a hump like the one along the center of the East Pa-

The police chief reserved the beach area for couples to nork their cars facing the sea and make love as long as they like. The police will guard the area against muggers.

7 Boxes Contained Books

Hunt Says He Held No Data That Concerned Rockefeller

By John M. Crewdson

MIAMI, Aug. 19 (NYT) .--Howard Hunt jr. said yesterday that, as far as he knew, the seven mysterious cartons stored in his office after the Watergate break-in in June, 1972, contained hundreds of copies of a booklength criticism of television news reporting but no information concerning former' Gov. Nelson Rockefeller of New York.

Hunt, one of the seven men who pleaded guilty or were convicted in the break-in, described as a "total absurdity" reports that the boxes had contained evidence that Mr. Rockefeller. who under consideration for the vice-presidential nomination, had financed demonstrations at the Democratic National Convention here in 1972.

The White House charged on Saturday that the "tip" concerning the apparently nonexistent documents was a hoax designed to discredit Mr. Rockefeller and thereby attempt to remove him from consideration" for the vicepresidency.

In an interview, Hunt, who is free here pending an appeal of his conviction, recalled that in the fall of 1971 he was approached

2 Leaders See House Finished With Nixon Case

WASHINGTON, Aug. 19 AP. -The Democratic and Repub-lican leaders in the House, Carl Albert and John Rhodes, said yesterday that the chamber should not get involved in more proceedings against former President Richard Nixon. "There will be no impeach-

ment proceedings " Speaker Albert, D-Okla., said on ABC-TV's "Issues and Answers" program, adding that Mr. Nixon "is no louger a civil official ... sub-Rep. Rhodes, R-Ariz., the mi-

nority leader, said on NBC-TV's "Meet the Press" program: "I can't see anything to be gained by any further action than the Judiciary Committee's filing this week of its report on its impeachment inquiry. Rep. Albert said that he does

not want Congress "to interfere" with the decision on whether Mr. Nixon should be prosecuted. He said: "It is a matter before the courts, or might be before the courts." Rep. Rhodes said that he does

not believe Mr. Nixon should be prosecuted, explaining: "Our system of justice is intended to flexible ... Mr. Nixon has suffered enough, as far as I am

Judge Rejects Calley Bail Bid

WASHINGTON, Aug. 19 (AF) Supreme Court Justice Lewis Powell today refused to free 1st Lt, William Calley on bail while he appeals his 1971 court-martial conviction in the My Lai massacre in South Vietnam

Justice Powell denied without comment a petition submitted to him last week by Calley's attorney contending that Calley has shown himself to be a good citizen and not to be a menace to society." Calley has been in custody

since June 20, after the U.S. Circuit Court in New Orleans ruled he was not eligible for bail. The Supreme Court refused on June 25 to stay that action. Calley, convicted on charges of premeditated murder and assault stemming from the killing of civilians during a patrol at My Lai, faces a sentence of 10 years. He asked a U.S. District Court judge in Georgia to review

his conviction.

by a woman assistant to Charles Colson, then a special counsel to former President Richard Nixon. He said the woman had asked Hunt, then a member of the White House special investigation unit known as the "plumbers." whether she might store seven bulky cartons in his quarters in the Executive Office Building,

next door to the White House. Hunt said that he agreed and that the cartons were moved into his office, which contained only a desk and a small, two-drawer safe. Five of the seven cartons, all of which bore the name of a publishing house, were sealed, Hunt said, but the two others contained copies of a book by Edith Efron, a television critic, entitled "The News Twisters."

Hunt said that he left the cartons untouched and that they were still in place when he made his last visit to the office on June 19. 1972, two days after the break-in attempt. He said he had no idea what became of them. The former Central Intelligence

Agency operative conceded that the five closed cartons, which he said appeared to have been sealed by the publisher of the book. might have contained some other materials of which "I was an innocent bolder. But he dismissed the possibility

as "ridiculous." in view of h**is** close association with Colson. The safe did contain rensitive documents, Hunt said, but nothing relating even indirectly to Mr.

Rockefeller The apparently erroneous tip regarding the "Rockefeller pa-pers" was provided to Philip Buchen, the new White House counsel, by Hamilton Long, a retired Wall Street lawyer who formerly headed a conservative Philadelphia publishing company, the American Heritage Education

U.S., Egypt Outline Economic Ties Break the had Invited Israeli Premier Yitzhak Rabin to visit. Weshington

By Marilyn Berger

WASHINGTON, Aug. 19 (WP). -The United States and Egypt signed a lengthy joint communiqué today spelling out new fields for economic cooperation but leaving vague the next steps toward a settlement in the Middle

At the same time. State Department officials said the United States would be sending 100,000 tons of wheat to Egypt during the first three months of this fiscal year. The wheat is worth \$16,520,000 to be repaid during a 20-year period at 3 per cent interest under the Food for Peace program. Egyptian officials had told the United States that it needed \$750 million in commoditles during the next year.

Egypt and the United States also agreed on a number of economic measures. These include efforts to "reduce obstacles to trade and investment" by con-cluding a convention for the avoidance of double taxation, efforts to stimulate a greater flow of private investment capital to Egypt for "promising industrial and infrastructure projects in Egypt" and tentative agreements on rehabilitating the Suez Canal

As part of the disengagement agreement between Israel and Egypt concluded in January, Cairo agreed to rehabilitate the cities along the canal—Suez, Ismailia and Port Said—a move which Israel saw as an added assurance against the resumption of warfare.

The communiqué noted that the discussions held by Egyptian Foreign Minister Ismail Fahmy with President Ford and Secretary of State Henry Kissinger "were a constructive contribution to the consultations now under way looking toward the next stage in negotiations." But it did not clarify what that next stage

Mr. Kissinger announced at a press conference today that he

Holy See Notes Its Concern Over Arrest of Prelate

VATICAN CITY. Aug. 19 (UPI).—The Vatican today ex-pressed concern over the case of the arrested Greek Catholic archbishop of Jerusalem, the Most. Rev. Hilarion Capucci, and expressed the hope that the situation would be clarified.

It was the Vatican's first official reaction to the arrest of the archbishop by Israeli police. Archbishop Capucci was arrested vesterday in Jerusalem on suspicion of acting as liaison and gun-runner for the Palestinian guerrilia organization el-Patah.

Greek Catholics Act

BEIRUT. Aug. 19 (NYT).— The Greek Catholic Church has begun efforts to obtain to release of Archbishop Capucci.

The head of the church, Patriarch Maximos Hakim, is sending a special emissary to Jerusalem to see the archbishop. He said he also was enlisting the assistance of the United Nations and the International Red Cross to facilitate the mission.

zhak Rabin to visit Washington during the first half of Septem-

The discussions with Mr. Rabin are expected to be critical in determining the next moves in order to maintain the momentum of negotiations. But the Israelis have been in no hurry to expedite the talks, wanting first to see how the agreements already reached work out, and Mr. Rabin has not yet accepted the

Later this week, Mr. Kissinger is to meet with Syrian Foreign Minister Abdel Halim Khaddam as part of the continuing consultations. The Syrian border could present a problem when the mandate of the United Nations force there expires in October. Unless some progress is made, Syria may balk at having the UN mandate renewed.

Jordan is insisting on some withdrawal from the West Bank before it returns to the Geneva peace conference, Egypt is eager for a further Israeli withdrawal from the Sinai but is concerned about getting too far

Today's communique Egyptian President Anwar Sadat will visit the United States be-fore the end of the year. It said Mr. Ford told Mr. Fahmy "he was looking forward with plea-sure" to Mr. Sadat's visit.

They also agreed that the Geneva conference should resume as soon as possible, the communique said. It said they should build on the progress achieved with the question of other participants from the Middle East area to be discussed at the con-

Egypt Prods Israel on A-Pact UNITED NATIONS, N.Y., Aug. 19 (Reuters).—Egypt pledged to-day not to be the first state to introduce nuclear weapons in the Middle East and urged Israel to adhere to the Nuclear Nonproliferation Treaty.

In a statement issued in his name here. Foreign Minister Pahmy said the widest possible adherence to the pact was vital. But because Israel had so far refused to adhere to it, he said, Egypt had no choice but to stop short of ratifying the treaty.

OPERA IN SALZBURG

Festival Gives Böhm A Birthday Present

By David Stevens

SALZBURG, Austria, Aug. 19 spirit world, the source of myste-(IHT).—Thanks to Karl rious threats and judgments, is Böhm's 80th birthday wish, the centenary of the birth of Hugo von Hofmannsthal, and the growing popularity of the opera itself Richard Strauss's "Die Frau Ohne Schatten" has returned to the Salzburg Festival program after a lapse of more than four decades, in a musically stunning and visually elaborate production.

Such a long absence from here is surprising for so weighty a collaboration by Strauss and Hofmannsthal, since composer and librettist and their separate and collective works are closely bound to the history of the festival. The earlier production of this operain 1932 and 1933, conducted by Clemens Krauss and with a starry Viennese cast—apparently posed problems in what is now called the Small Festspielhaus, with its limited size and technical equipment overtaxed by the opera's mammoth demands.

Now, however, the festival also has the Large Festspielhaus, and its immense stage and modern equipment have rarely been so fully used as they were by stage director Gunther Rennert and designer Günther Schneider-Siemssen in realizing this multi-level fairy tale, full of symbols and magical happenings,

First Scene

The designer takes the work's multi-level aspect literally. In the first scene, the emperor's gossamer realm seems to float weightlessly in the upper left of the stage opening. As the scene changes and the demonic nurse tells the empress, "Let us go down," they literally go down to the stage floor as the numble subterranean dwelling of Barak the dyer and his wife rises to view from below stage level. The **MUSIC IN LONDON**

ONDON, Aug. 19 (IHT).-Jazz

piano was the object of the

perceived as a door and threshold in the elevated distance. This fragmented stage, which smoothly handles the frequent transformations of the first two acts, becomes whole only in the third as the imperial and earthly couples approach the mutual solution of their marital difficulties, Alas it is here that Schneider-Siemssen slips over the line into fairy-tale-book kitschiness. When the empress finally casts a shadow —the symbol of maturity, selflessness and fertility—it appropriately reaches to and joins her with the emperor. But the golden bridge that then links Barak and his wife works so punctually as a deus ex machina that it gives the impression of the stage electrician as heavenly marriage counselor. Perhaps myths and symbols should not be seen to work quite so efficiently.

Familiar Care

But much of the time, it was masterful use of sophisticated equipment and lighting, and Rennert's direction was an example of his familiar detailed care in developing character by straightforward means. In particular he highlighted the central role of the baleful nurse as an unsuccessful broker in human emotions, and the ungrateful part of the coldly egoistic emperor, greatly aided by superb performances from Ruth Hesse and James King.

The entire cast-also headed by Christa Ludwig as the dyer's wife. Leonie Rysanek as the empress and Walter Berry as Barak-was splendid. Since the five principal roles were sung at the premiere on Friday by the same singers as in the superb Paris production two years ago, comparisons are invited. Here, the larger space

The Problem of Alcoholism Among Adolescen

By Enid Nemy

NEW YORK (NYT). - Alcohol IN abuse, alcoholism and the combined use of alcohol and other drugs among adolescents in New York City has become an "alarming" problem, according to Joel Bennett, president of the New York Council on Alcohol-

Mr. Bennet, noting that "alcohol is sort of the accepted natranquilizer," estimated tional that 60 percent of 1,048,000 city youngsters between 12 and 18 years of age use alcohol and that approximately 36,000 adolescents here now have early symptoms of alcoholism and alcohol abuse.

A recent limited survey by. a community agency in the Yorkville district of New York showed that 50 per cent of about 175 young people between the ages of 14 and 18 drank twice a week

Souvanna Plans Rest in France

VIENTIANE, Laos, Aug. 19 (AP).-Premier Souvanna Phouma will go to France Sunday to spend two months recovering from a heart attack he suffered five weeks ago.

Foreign Minister Phoumi Vongvichit, a leftist, will be the acting premier. Sources said the 72-year-old

Premier was making a good recovery. A group of international heart specialists recommended last week that he recuperate in a temperate climate. . A team of doctors led by

Laotian Health Minister Dr. Khamphay Abhay will accompany him to France, the sources

Italy Lifts Veal Ban ROME, Aug. 19 (Reuters).-The Italian government announced today it was lifting a ban on veal imports from the Notherlands. The ban was impos-

ed on July 3 because of mer-

cury contamination,

and that 10 percent were "chronic" drinkers. At Hunter College, 27 per cent of about 250 freshmen indicated they had engaged in some kind of drinking pattern before the seventh grade.

The problem is by no means limited to New York. Dr. Morris Chafety, director of the National Institute on Alcohol Abuse and Alcoholism, said that 14 per cent of high school seniors acros the nation get drunk at least once a week. And national fig-ures compiled by the U.S. De-partment of Health, Education and Welfare indicate that by the time they are in the seventh grade, 63 per cent of boys and 54 per cent of girls already have

had at least one drink. Allan Luks, executive director the New York City affiliate of the National Council on Alcoholism, insisted that the problem goes beyond drinking.

"It's not an alcohol prob-lem, it's a drug problem," be said. "Society is concentrating on eliminating the use of certain drugs like heroin; but it hasn't solved the switch to another drug to get a high. The dramatic use of mood-

changing drugs by youth parallels the increasing stress and strains we find in urban life, the breakup of the traditional family and the new drug laws and decreasing supplies of narcotics," he continued. "Alcohol is cheap and legally

and readily available. Youngsters don't understand it is a road to addiction that can kill. Parents don't understand the similarity of all mood-changing drugs and therefore don't worry about their children's use of alcohol."

Mr. Luks said, too, that young people now were either ingesting alcohol at a faster rate than their parents or had an addiction problem of another kind before starting on alcohol. The percentage of alcoholism

among the young is still a small one. It is, however, Mr. Luks said, highly significant because alcoholism usually requires years to develop, and there are indications that it is now becoming a

disease of the young rather than the middle-aged.

"We receive about 4.500 calls a centage of the total, but year and 2,500 of them result in number of kids drinking in referral for treatment," he said. "Before the 1970s, the number of teen-agers and young adults was. almost nil. Last year, we had 24 referrals for trestment under 19 years of age, and 109 in the 20-to-25-year-old category."

"Sure the number of full-to alcoholics is still a small schools is an enormous probi said John Guerin, director of cohol Services of the New Department of Mental He whether these people will be alcoholics."

45 Europeans View the U.S - Not Much Difference'

NEW YORK, Aug. 19 (NYT).-Forty-five young middle-class Europeans who recently ended a one-month crash course about the United States found the country friendler than they had expected, Washington a hit provincial. New York not as dangerous as advertised and prices similar to those in their own countries

The course took participants to Michigan State University for two weeks, American University in Washington for a week and in Washington for a week and This is how reviewers concluded with a week at Column for The New York Times bla University.

"I've seen everything you can imagine farms, factories, museums, skysorapers," said 23-year-old Anthon Fynhoe of Lemvig, Denmark "I don't think there's very much difference between the way you're living and the way we live in Scandinavia but you Americans are very proud of your-SCAYES".

Mariella Ostinelli a Swiss. said she was most surprised by the advancement of women's lib-in Switzerland women justsit down and wait for someone else to watt on thems." Of Washington, she said, Everything is government, they just look at government. Id rather live in New York-it's much more interesting."

Tragedy With a Moral

The shooting of Ambassador Rodger Davies in Nicosia was a tragic event—with a moral. In a world that is largely undiseiplined, and which tends to regard diplomats (or tourists, or businessmen or casual passers by) as sacrificial heasts to be offered up for the sins of their own country or the pride of the nation they are visiting, the incident might be regarded as simply one of the signs of parlous times, and especially, in the light of past killings, of the risks attending a diplomatic career. But in the particniar context of the Cyprus imbroglio, it has a special lesson for American policy makers.

It adds a sharp and bloody exclamation point to a fact that has long been evident: that the United States could not have satisfied all sides to the Cyprus quarrel. And the policy - the Truman Doctrine - that armed and aided Greece and Turkey, and brought them into NATO was based on the assumption that the frictions between these two old enemies would never reach their present temperature. Whether the United States, given the limitations under which the policy operated, could have avoided this clash is doubtful although the second-guessers probably have a different point of view. The current threat to the American position in the Eastern Mediterranean is of a kind that is intrinsic to a course of action in which strategic hostages are given in return for strategic advantages.

When arms and military assistance are

given to South Korea to defend it against North Korea, to South Vietnam to defend it against North Vietnam, the hostages are threatened less by the enemy-who is taken for granted-than by the political conditions in the host country, the Parks and the Thieus. Both of these political leaders are expensive embarrassments to the United States. And when two allies fall on one another, as in Cyprus, the embarrassments are compounded.

Programs of military assistance which began with Truman, were vastly extended by Dulles and generally accepted by their successors, are now under new scrutiny under the "lower profile" and the "detente" that accompanied the still nebulous Nixon doctrine. The actual overseas American presence, as opposed to shipments of material or treaty commitments, has been reduced in many areas, although the possibility of new naval bases in, say, the Indian Ocean, exists.

In general the United States has been pulling in its horns, in part through a realistic evaluation of its genuine strategic interests in a changing world, and in part due to the neoisolationism that, after the Vietnamese entanglement, fostered the old, but never quite dead, opposition to internationalism. If the tragedy in Nicosia helps give focus to the first element, it can do good. It is even more likely, however, to encourage the America Firsters of today, which would be bad for America and for the world.

Oil Prices and OPEC

American hopes for lower international oil prices are currently caught in the internal politics of Saudi Arabia. The incident is evidence of the growing strains among the oil-exporting countries, as the evidence of a worldwide oil surplus becomes steadily clearer. For Americans, it is a moment to consider carefully their own dilemma. If world oil prices should start moving sharply downward, as Secretary of the Treasury William Simon keeps predicting, what is the proper response for American energy policy? It is not a narrow question for technicians to answer. To the contrary, it is one of the short list of key policy issues through which President Ford will set the basic tone and direction of his administration. For the immediate future, the level of

world oil prices probably depends on the outcome of the current dispute within the Saudi government. Ever since last winter the United States has been pressing the Organization of Petroleum Exporting Countries, the producers' cartel, to pull down the prices that it quadrupled in the course of 1973. But there is a lot more than economics to the pricing of oil. In the decades when the industrial world played one producer against another to keep prices low, a deep resentment built up in the countries that now compose OPEC. Now that these countries have built an alliance that works, their pricing system has as much to do with national prestige and political status as with market forces. Persian Gulf oil, the cheapest in the world, generally costs about 15 cents a barrel to produce. At the beginning of last year it was selling for about \$1.80 a barrel: the prices now average about \$9.50. Secretary Simon keeps predicting that overproduction will force that price down \$2 to \$3 a barrel over the next year. On his recent trip to the Mideast, he carried along an elaborate study arguing that the OPEC countries would actually make more money in the long run by reducing prices now, But -with one important exception-the OPEC oll ministers are flercely determined not to let the industrial countries push down those prices, and they are threatening to cut back production if necessary to hold them.

The exception is, of course, Saudi Arabia's minister of petroleum, Shekh Ahmed Zaki Yamani. He has been saying for months that the producers are pricing themselves out of their market and damaging their own real interests. Sheikh Yamani's views are met with sharp hostility within OPEC. At OPEC's last meeting in June, it voted another small but symbolic increase in oil prices as a gesture of defiance to Sheikh Yamani. Later the Kuwaiti government extracted another symbolic increase from its two concessionaires, Gulf Oil and British Petroleum, by a simple threat to cut them out of all future sales if they refused to go along. The State Department put out a statement chiding Gulf, but no one seriously believes that Gulf had any alternative.

Still, the cartel depends entirely upon the cooperation of its richest member, Saudi Arabia, which possesses the largest and most accessible oil reserves in the world. In July, when Secretary Simon was in Saudi Arabia, Sheikh Yamani announced the government's intention to auction off a large amount of oil this month. It was to have been a supply of 1.5 million barrels a day for 16 months. The Saudis told Secretary Simon that, unlike other recent Persian Gulf auctions, they would impose no minimum price and would accept whatever was bid. The effect obviously would have been to pull down prices. The Saudis "clearly have been working toward achieving more reasonable prices," Mr. Simon reported with satisfaction to a congressional subcommittee upon his return.

But, oddly, the Saudi auction has now been postponed indefinitely. The explanation seems to be that Sheikh Yamani has been overruled within the top circle of the Saudi government. Other men in that government have less interest in maximizing their market, and they draw back from an open break with the other Arab oil coun-

If this auction does not take place, the immediate prospect for a formal lowering of oil prices becomes less hopeful. But then OPEC will have to confront the fact that it is producing more oil than, at its present prices, the world will buy. Whether OPEC can stick together on a production cutback plan remains to be seen.

For the United States, either possibility raises uncomfortable issues. Continued high prices mean, for Americans, continued inflationary pressure at home and trouble in the balance of payments. If world prices begin to come down, the choices become even harder. Lower gasoline and fuel oil prices to industry and the consumer would only put the United States back onto the track it was following last year: Steadily rising oil imports, resulting in steadily rising dependence upon Arab producers who have now demonstrated their readiness to use oil as a political weapon. Does the United States really want to increase its dependence on Arab production? But if fuel prices stay high, will none of these costs be returned to the American public through reformed taxation of the oil industry?

The only wise policy for the United States is to keep working to reduce its dependence on any one foreign source. That may mean limiting imports. It certainly means continuing to pay higher oil prices than, until this year. America has been accustomed to. In return, the American public can fairly ask its government at least to revoke the special tax benefits enjoyed by the oil industry. But it is worth a considerable price to diminish U.S. economic vulnerability to the succession of disruptive and unpredictable decisions that, over the past year, have characterized OPEC.

International Opinion

Ford Viewed From the Orient

Mr. Ford is not an intellectual giant and his lack of experience in international affairs won't make his job easier. But after the

ignominious failure of America's supposedly intelligent leadership, perhaps the down-toearth style of Mr. Ford can get the United States moving again.

-From the China Mail (Hong Kong).

CHICAGO-Testimony in the case of Loeb and Leopoid was completed today when Clarence Darrow, chief defense counsel, finished his cross examination of Dr. William O. Krohen. The fate of the self-confessed slayers of the Franks boy now rests in the hands of Mr. Darrow and Mr. Crowe, the state prosecutor.

Chappaquiddick: Still Percolating

By William V. Shannon

WASHINGTON-In going over the side, Richard Nixon may have taken Edward Kennedy down with him,

Sen. Kennedy remains well in the lead as the prospective Democratic nominee in 1976. But Nixon's collapse makes the nominaworth considerably less to him than it would have been otherwise. After the public has rebelled against a cover-up at the Watergate, will it buy a coverup at Chappaquiddick?

If Nixon had been less directly involved in Watergate, he could have survived in office until the end of his term. That would have been ideal from a Democratic party viewpoint. The next presidential election would then have been fought between two nonincumbents with the GOP candidate carrying the burden of an unpopular, scandal-stained ad-

'Mr. Clean'

As it is, President Ford comes on as "Mr. Clean" and will have the advantages of incumbency. The 1976 campaign may thus turn on normal economic and foreign

policy issues.

The problem for the Democrats, however, is that if Kennedy is their nominee, it will be hard to focus attention on those normal issues and on such mistakes as Ford may have made by then. Instead, the Republicans will have no difficulty establishing as the prime question-do you believe Sen Kennedy's story of what happened that night at Chappa-

The drowning of Mary Jo Konechne and Kennedy's failure to notify police promptly or to seek help from a nearby house would have become an issue whenever he ran for president, But if Nixon had clung to power through the next election, Kennedy and his managers might have been able to establish in the public mind the fiction that Chappaquiddick was an old story, that it had all been hashed over before, and that it was in rather bad taste for any Republican to bring up the subject. As the saying goes, why rake up the dead

Under those circumstances, the Chappaquiddick story would only have percolated below ground. But after the paroxysm of press expose, public indignation, and congressional investigation of Watergate, there is no chance that the Chappaquiddick story can be pushed underground. It has become legitimized as a topic of political controversy. The public will expect to get all the facts and will expect to make a judgment on those facts as it did on

Feeble Inquest

The facts have not been forthcoming yet. No autopsy was performed. The coroner's inquest was a feeble and inconclusive affair. Sen. Kennedy's speech to the people of Massachusetts was in the inglorious tradition of Nixon's "Checkers" speech, a mixture of partial and self-serving information mingled with and overwhelmed by an emotional plea for sympathy. It cannot stand as Kennedy's final word on the affair.

Robert Sherrill's article in The New York Times magazine for July 14, 1974, entitled "Chappaquiddick Plus 5" was a major political event. Sherrill raised pertinent unanswered questions and pointed out serious discrepancies in the authorized Kennedy version of events. Unless Kennedy

elect him. Can he persuade the can clearly respond to those questions and reconcile those discrepancies, they will dog his footthroughout the next presidential race His rejuctance to face the

Chappaquiddick issue confronts his party with another problem. As long as he remains a potential candidate in 1976, his shadow keeps the smlight from reaching any other putative Democratic It is easy to understand why.

Aside from his famous name and his family's legend, he is a superb candidate. He is an excellent speaker able to put serious issues in clear and dramatic terms; he has physical presence, an easy charm, and goes at the grueling business of campaigning with verve and gusto. Contrary to what was said of him when he first ran for the Senate a dozen years ago, he would be a forcandidate today even if his name were Edward Moore. But because his name is Kennedy he has a devoted constituency that would make him a hard man to beat in a Democratic primary in any Northern state.

That loval constituency can

WASHINGTON - When in

doubt, hesitate," is a maxim followed instinctively by most of

nominate him but by itself cannot

independent voters as long as the full truth of Chappaquiddick remains unexplained? That is the question that haunts other politicians in his party, including many who are sympathetic to

The Democrats are not bereft of other talent. Aside from several well-known senators, there are others deserving of serious consideration such as Rep. Sidney Yates of Illinois and Rep. Morris Udall of Arizona, Mayor Kevin White of Boston and former Mayor John Lindsay of New York, and Gov. Reubin Askew of Florida and Gov. John Gilligan

But these alternative candidates cannot capture sufficient attention to be discussed seriously. As of now, none of them has his visible political strength but it is entirely possible that one of them could be elected in 1976 and that Kennedy could not. Until he resolves the Chappsquiddick mystery to the satisfaction of fairminded people or withdraws from the race, however, the Kennedy problem will loom darkly over the Democratic party's future.

A second argument is that un-

Bernard Levin From London:

This is a valedictory, for it is the last of these columns. I will no longer be reporting fortnightly on my curious, indeed unique, country in this space.

for it is the last of these columns. From now on, though Britain will still be here, I will no longer be reporting furthightly on my curious, indeed unique, country in this space. Looking back, I am somewhat startled to discover that I have been writing here for over eight years. Once, nothing very much happened to a country in such a brief period, unless it was stricken by invasion, revolution or the piegue, but that was a long time ago: eight years now see more changes than were previously effected in 80, or—if you go back far enough —even 800. And perhaps I may today indulge myself by looking over my shoulder at the shifting patterns of life in Britain since the mid-1960s; at any rate I can promise that I will make in predictions in conclusion.

When I began, Britain had not long emerged from the Macmillan era and its strange appen-dix, Sir Alec Donglas-Home, Tile 1964 election, for those with sharp enough eyes, could be seen as the watershed between past and future. It was the election in which Mr. Wilson, divining with all his instinctive political genius that if there was a new world coming he had to ensure that the Labor party would be part of it, spoke for the first time. of "the white heat of the tech-nological revolution." (From that slone, you can see what I mean about the speed of change now. Anyone who dared to use that phrase today, or even a less threadbare version of it, would be hooted from the platform on which he was speaking, so sharp has been the reaction against such brave new worlds. Today, any party leader who wanted to catch the tide of history, or at least his hearers' attention, would be well advised to talk about the limits to economic growth.)

No White Heat

There has been, of course, to white heat and precious little technological revolution. But Mr. Wilson, for all that, had guessed rightly; he won that election, and Sir Alec Douglas-Home was promptly succeeded by Mr. Heath as leader of the Conservatives. Both sides had now recognized that Britain's old world of easy economic domination by the use of ancient and trusted methods had come to an end. "Expert or die," the slogan used to run; in the 60s, we began to realize that it might be the literal truth. And so the great march toward Europe got under way.

Macmillan prepared the ground, Wilson tilled it, Heath sowed the seed, and the EEC brought the fruit to season. Alas, it was not to be as simple as that, for by the time Britain was in, Mr.

sults apt to be unhappy for

The final story on Mr. Nixon.

moreover, is not yet in. New evidence is likely to come out

as more tapes are processed

haps in the form of confessions.

what Mr. Nixon himself does. It will be one thing if he takes the advice of President Ford and

searches for a personal peace. It

will be another thing if he, in

his refusal to recognize guilt.

goes to the point of taying to

Then there is the question of

Watergate special prosecutor. The

everybody.

TONDON This is a valedictory. Wilson, facest with the problem: of his westering control over the Labor party, had succumbed, or his invariable principle of "he who fights and runs away, live to fight another day," to the forces of his party which were opposed to Britain's membership of the KEC. By using the excusthat the terms (which he would himself have been happy to ge and eager to commend) were no good enough; he launched the Labor party on a dangerou-course which may yet end in Britisin's withdrawal from Europe

altogether.

These years have seen anothe phenomenon, unpredictable when they began, namely the hugand rapid increase in the politpower of the trades unions No government now, of whatevepolitical complexion—no democratic government, anyway-car rule without the unions' cooper ation, nor, it seems, impose legislation, even backed by an ample parliamentary majority, which the unions reject. Neither major party has yet come to terms with this fact, so recently has it be come superent that it is a fact The Labor party is only now be stirring itself to face the implications of the increasing unior control in its counsels, and the Conservatives are almost entirely without a coherent response to the new situation. And yet a I say, eight years ago only the most prescient seer could have predicted what has happened and none, as a matter of fact actually did.

But if it was difficult to see

halfway through the 1960s, what would happen on the labor from how much more crazy would it have seemed if I, in an early dispatch from London, had suggested that before the 1970s were a year old, civil war would be raging in the streets of Britain I do not know what is the present count of those civilians and military-killed in Northern freland in the last four years; certainly it is four figures, and the number of those seriously injured is by now probably beyoud counting, while the member of buildings destroyed is quiv certainly so. You cannot fire anybody, moreover, who expresse Uister, which may yet turn on to be Britain's Vietnam, so show a time is now needed to trans form that which was once ut en unthinkable into that which i accepted as the normal condition

of everyday life. No Predictions I suppose, indeed, that that is

in essence, the fundaments change that has taken place Britain. From our collapsing postal and telephone system & our ever-increasing inflation from decimal currency to metrimeasure, from frequent train jams to permanent traffic jeme from political and industria violence as an exceptional an newsworthy occurrence, to th same things as a burid an apparently permanent backdro to our lives. From this above all-should certainty that what ever else died or changed, on main basically the same what ever happened, to a state of af fairs in which talk of dictator ships of the right or the left i the common parlance of the day That is the kind of journey of which Britain has gone in the last eight years, and again an again I am reminded of ho improbable most of what his happened would have seemed a the beginning of that period Surely you can see why I wi make no predictions today, an why, indeed, there are few a bold as to make predictions of

any kind anymore. There is still strength in Brib ain's way of life, still resilience Something developed over a many centuries does not—use not to anyway-disappear over night. And, of course, Britain problems are not hers alone: a advanced countries have the own versions of the same malala All the same, though hope is not yet actually illegal, it is certainly out of fashion. I mut needs conclude with the work used by Lord Clark at the eq of his mammoth television serie "Civilization." Said he: "On may be optimistic, but one can exactly be joyful at the prosper

For the time being, however, we don't know enough to make

clear decisions with confidence: It makes sense to hedge bets. It also makes sense to leave the decision to those entrusted with the responsibility in this case, to special prosecutor Jaworski And only the willfully obtase will fail to understand why he would want to postpone a decision until the passions of the past few months are spent and the dust of the resignation has settled,

Disappointing News for Foreign Buyers

Only Average Canada Wheat Crop Is Seen

By William Borders

WINNIPEG, Manitoba (NYT). -As the farmers across Canada's broad, golden prairies begin their annual harvest of wheat they have disappointing news for eager buyers around the world: At a time when Canada, one of

the world's major wheat exporters, could be selling record amounts of it to a hungry world, the harvest this year will be no better—and quite possibly worse than average.

Moreover, labor problems are slowing the distribution of wheat,

and grain ships from Chine and Japan are waiting empty in Canadian waters, as scheduled sailing dates slip by. "This was the year everyone was

counting on to be the really good one," said a spokesman for the Canadian Wheat Board, the goveroment marketing agency here. "But now those hopes are pretty well gone."
This latest asse

pressure to an international food market that is already tight because of rising populations, it swipe at several large droughts, worldwide shortages and reduced crops in some of the other

An article in the International Monetary Fond survey accompanying the figures said there was a "marked shortening of maturities" in the period, reversing the trend toward longer maturities that had prevalled in 1973. It said only 3.6 per cent of loans had maturities of over 10 years in the first half of 1974, compared with 11.6 per cent in 1972. The figure for the second quarter of 1974 was only I per cent.

The survey said lending to developing countries continued at the same high levels of the secand half of 1973. Total lending for developing nations was \$6 billion in the first six mouths of 1974, compared with \$9.1 billion dollars in all of 1973.

The seven largest borrowers among developing nations this year have been Mexico, Spain, the Philippines, Brazil, Argentina Peru and Greece, all with borrowing of over \$250 million.

FINANCIAL NEWS AND NOTES

cluding parts of the United States. Largely because of a late, wet spring here, Canada now expects to harvest only about 550 million bushels of wheat, which would be a decline of 30 million bushels from last year's average-sized crop, instead of the sharp improvement that the government

planners had been talking about

earlier in 1974. Because the world market price of wheat has doubled in the last two years, to more than \$4 a bushel, the farmers here in the rich, flat Big Sky country are more prosperous now than they have been for some time.

After a number of lean years. they are suddenly fixing up their farms and buying new equipment at a vigorous pace, and they had been expected to give a lot of their land this year to wheat. In the 1960s it was not unusual for the Canadian prairie

farmers to plant 29 million acres of wheat. But then came the market glut of 1970, when the country had the equivalent of nearly two years' harvests in "It scared us when they couldn't

sell our wheat; it's a time we northwest of here, explaining that even though the market situation has reversed again since then-with customers all over the world now eager to buythere is still some hesitation at the individual level about planting wheat.

This year, the government had suggested the planting of 28 million acres of wheat, and a survey of farmers' intentions last winte indicated a wheat acreage of 26 million, which still would have been a substantial increase over last year.

But, as often happens out here, the weather changed people's plans. The spring rains were unusually late and heavy, and by the time the land was dry enough for planting it was too late in a number of areas, and so the prairie land in wheat about to be cut now totals only 23 million

Canada exports four bushels of wheat for every one it keeps, and for years Japan and China have been among the major customers. But this spring and summer, ex-

ports to the Pacific have been stalled by a work slowdown staged. by grain handlers at the port of

Vancouver in a contract dispute. Japanese and Chinese The have both protested about the delays as their ships sit in Vancouver harbor waiting to be This country's shipments across

the Atlantic are also threatened, because of the current strike of engineers and officers on Canadian Great Lakes ships. The Wheat Board estimates that its wheat stockniles at Eastern ocean ports will run out within weeks, and exports will then drop off sharply, if the strike is still going

Because of distribution problems caused by domestic labor disputes, wheat exports in the statistical year that ended July 31 were only 420 million bushels. down 20 per cent from the year before, even though there was an increased supply of new wheat available for export.

Labor Seeks To Take Over Plane Firms

LONDON. Aug. 20 (Reuters).— Britain's Labor party today put forward its latest nationalisation plan, proposing that the nation's two chief aircraft builders-British Aircraft Corp. and Hawker Siddeley—should be taken over at cut-rate compensation by a new body to be called the Brit-ish National Aerospace Corp.

The proposals were approved by party and trade union leaders. but they do not yet amount to official government policy.

A party document argued that the government was not only the largest provider of funds for the aircraft industry but also its biggest customer. Most U.K.-built planes are sold either to the nation's armed forces or to the nationalized airlines, the document said.

It urged a sharper sales grive to capture a bigger share in world markets which now rely heavily on U.S. equipment. "A planned and coordinated attack on world markets would result in a revitalized industry," the document

According to the Labor plan. BNAC would acquire control of the country's two major airframe manufacturers and at the same time it would acquire major assets in these companies' production of guided weapons.

The plan exempted the Short Brothers aircraft company in Northern Ireland.

One aspect of the document that seems certain to raise fierce opposition is the subject of compensation. Normally this is based current stock market value. But the document suggested that any compensation formula in the aircraft industry should take account of the large public funds pumped in over the past few

Rand Devalued Again JOHANNESBURG, Aug. 19 (AP

DJ) .-- South Africa today devalued the rand in terms of the U.S. dollar for the second time in a week. The rand-dollar rate, pulled down from \$1.50 to \$1.47 Aug. 14. was dropped by the reserve bank today to \$1.45.

Greenspan Confirmed

WASHINGTON, Aug. 19 (Reuters).-The Senate confirmed the nomination of New York economist and business consultant Alen Greenspan to be chairman of the Council of Economic Advisers.

Losses Widen On London Stock Market

FT Index Falls 10.5 To a 16-Year Low

LONDON, Aug. 19 (Reuters) .-Deep depression hit the London funancial community today as the index of leading U.K. shares fell below the 200 mark today for the first time since Oct. 3, 1958.

The Pinancial Times index of 30 shares lost 10.5 points today, following a decline of 27 points last week. At the close of trading it stood at the 16-year low of 199.8 after piercing the 200mark psychological barrier.

Two and a half years ago the index hit a high of 543 and so far this year it has dropped by per cent after standing at 344 at the end of December.

Confidence has been eaten away hy a combination of economic factors. The cash position of most companies has been squeezed by continuing high in-flation accompanied by price conseezed by continuing high introls and stiff government taxes on profits.

General fears of inflation and possible recession have been reinforced by high interest rates, the impact of higher oil prices. massive balance-of-payments deficit and distrust of the Labor government's plans for further nationalization of industry.

The collapse of the Court Line holiday giant last week also nurt investors' confidence, setting off a spate of rumors suggesting other hig companies might also soon run into financial dif-

Sterling suffered from the uncertain outlook today, tumbling almost two cents against the dollar this morning to its lowest level since mid-March, before recovering some ground. It closed at \$23214 compared to Friday's \$2.3405. The Bank of England was believed to have given some support.

The strength of the dollar was a factor in all European currency trading, but dealers said the pound's fall outstripped those of other European currencies against the U.S. currency. Today's broad decline in share

rices on the London Stock Exchange slashed another £900 million from company values. The amount "lost" since the start of the year is about £18 billion.

Wall Street: End of a 3-Year Binge Top-Tier' Stars the correction of past institu-

- The institutional speculation institled the 1970-73 advance of prices on the New York Stock Exchange is in the process of being purged.

That buying spree by banks and other big investors centered almost entirely on a relatively small group of "top-tier" stock-

zeroing in on the same stocks Robert Farrell, technical evand spilling over in lesser degree pert at Merrill Lynch, believes to more-depressed issues. The correction of institutional favorites is well along, but the painful process has further to go, analysis say, Neither the resignation of President Nixon nor accession of President Ford has done more than create a transient blip in the redress of what have been widely viewed as excesses of the two-tier market.

"It doesn't surprise me to see the growth stocks get it between the eyes," says Anthony Tabeli. a technical analyst, "and I don't think it's over. I think growth

stocks will go lower and will be underperforming the market when it turns. This isn't necessarily bad. These stocks vere out of line for more than two The current market weakness is

> that weakness lately in top-tier stocks, which has not been matched in degree by secondary issues, "suggests that the overall process should be in its late phase. Even if this downward move goes to extremes, he ands, "I think we're approaching a significant intermediate low" in the market. By measures that he uses, the decline in troath stocks as a group has moreded the serbacks they experienced in the 1962, 1966 and 1970 market

drops.

If, as some analysts believe,

Eighth Consecutive Fall Puts N.Y. Prices at 4-Year Low

NEW YORK, Aug. 19 (DIT) .--The problems of inflation, crop shortages and high interest rates kept a stranglehold on the New York Stock Exchange today, driving prices lower for the eighth consecutive session.

The Dow Jones industrial at erage fell 9.70 to 721.84 to another four-year low. Volume totaled 11.67 million shares compared with 10.51 militon shares Friday.

High-priced glamours and blue chips were weak. IBM lost 1 3 4 to 196 3 4, Polaroid 1 to 23 1 2. Exxon 1 1 8 to 70, and Eastman Kodak 1 5.8 to 81 7 8. Du Pont slid 2 1 2 to 134. It

said a change in accounting procedures will add a \$110 million charge to first-half earnings, which will be restated to \$5.10 a share from \$6.12 reported previ-Upiohn lost 6 3 4 to 62 1 8. it.

said it has expanded its packageinsert warnings on two of its antibiotics-Lincocin and Cleovin –to include possible reaction from use of the drugs. Alcoa eased 1.2 to 46. The

company said it will discontinue production and marketing of household aluminum foil at the end of the year because of the shortage of metal and capital funds in the aluminum industry. Standard of Indiana dropped Clark 1 1 2 to 21 3 & The American Stock Exchange index fell 1.09 to 74.78.

Gant Yellovkmie was most active, closing at 13, off 1 7.8. Syntex rose 1 4 to 37 3 4. Texas International was oil 3 8 at 43 8 and Hartz Mountain fell 1 3/8 to

Bond prices clused firmer in larly quiet trading. Government issues continued to move ahead. reflecting the indications that Arab oil-producing states are now fully participating in the Treasury securities market, Corporate issues also moved

higher, although trading was at a fairly low level. Gains ranged between 1,8 and 1.4. In Chicago, several waves of selling pressure in the closing

minutes preduced limit declines

in some new soybean and soybean oil lutures. There appeared to be mo particular outside reason for the selling other than profit-taking

and liquidation alread of expiration of contracts. Late weakness in corn and vals appeared to have been influenced, to a degree, by some trade reports that rain had fallen

sections of the perched

tional "excesses" is not yet com-plete, it is unlikely that the Dow Jones industrial average will cs-cape further pressure. The 59 blue-chip stocks un the average include several institutional growth favorites and a few other stocks that are still trading at premiums to the 8.2-times-carnings multiple of the average as Most prominent of these are

Eastman Kodak, at 20 tance latest 12-month net; Procter of Gamble, at 23 times, and Sears Roebuck, at 14 times.

Waller Burns and Charles Kirkpatrick, technical analysis at Lynch, Jones & Ryan, believe the next market phase could be a severe but brief plunge. "We think the bear market has gone over the brink into its final decline," says Mr. Burns, "and that our downside objectives of 550 to 600 in the Dow Jones 'ndustrial average will be reached in a relatively short time, probably within six to eight weeks."

Mr. Burns believes the current decline marks the end of a fouryear cycle of leadership by highquality stocks. He looks for the upturn to take place in what he calls "washed-out" stocks ignored by investors during the past three years. The next bull market he says, will be led by low-multiple secondary stocks, other than by industry grants.

"The old favorites will rebound from the bottom, but we think they'll be left way behind in relative performance by the stocks nobody has wanted in the past lour years," he says.

Negative Report on Xerox LOS ANGELES, Aug. 19 (Reutersy.-Merrill Lynch, Pierce, Fenner & Smith has issued a strongly negative appraisal on the future of Xerox. The brokerage house recon-

mends that the stock, one of Wall Street's glamour issues, is "okay to sell," not only for the next several months, but for the longer term as well. Previously it had been sug-

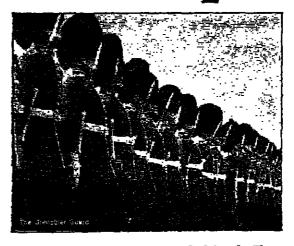

gesting an "okay to self" on the intermediate term. But after examining the company's luture potential, it now concludes that long-term sale also is justified. The stock has fallen this year from 137 to 85 and despite the

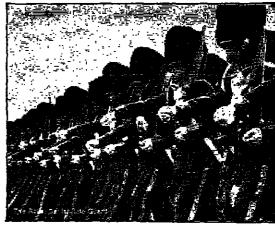

said it believes the shares "will continue to underperform the market averages." Xerox slock lell 6 5 5 on the New York Stock Exchange today

London is OK, but Copenhagen...

Midwest.

There are lots of cities in Europe where a weekend is worthwhile. "Swinging London" is certainly one of them. But would, should and could you spend all your weekends in London -- particularly if you happen to live there? Why not consider a weekend in Copenhagen? Our city is also one of the attractive spots on the touristic

map of Europe. Of course we have most of what you can find in other large cities -- plus something which is difficult to explain and define: a specific atmosphere of friendliness and what with an absolutely untranslatable term we call "hygge". Come and see for yourself. Transport companies and travel agencies offer special fares and packages in the fall and

Your usual, local contacts in the travel business may supply you with information on Copenhagen -- or ask for further material on your special interests from

THE TOURIST ASSOCIATION OF COPENHAGEN 55, Raadhuspladsen, DK-1550 Copenhagen V. Tel. 45 1 13 70 07

"We are proud that according to surveys on the image of Copenhagen, our city stands out as a remarkably attractive tourist destination. The concensus is that fall and winter are top seasons -- in many ways even more interesting and eventful than the summer season."

with the consummation of the merger. stacker says. The Dow transaction would value of about \$4355 million. IP first is a merger with General Crude in June, ndrew the bid last month. Subsequently. Crude agreed to merge with Dow. On IP made a second bid, offering \$47.50 a 1 share of General Crude, and \$190.68 for

AND THE PROPERTY OF THE PARTY O

each share of preferred. It had originally offered \$45 and \$180, respectively. On Sunday, IP awestened its offer again, to \$50 and \$200.60 worth about \$485.7 million.

Major Pulp Mill to Be Built in Brazil A major puip mill is to be built in Brazil capable of producing about 400,000 tons of bleached cellulose annually. The project is being undertaken by the Brazilian subsidiary of British-American Tobacco (BAT), which will initially hold 12 per cent of the ordinary shares of Aracruz Cellulosa and 20 percent of its total capital. Even-tually, it says, these holdings could rise to 25 and 30 per cent, respectively. Other participants in the project include Lorenzten, a Norwegian shipping group, and leading Brazilian corporations. BAT says the total investment including housing. roads, harbor and water facilities will be \$340 million. The mill is scheduled to start production in early 1977 with its raw material coming from a forest of 80 million eucalyptus trees.

Decline Seen in Japanese Profits '

Two Japanese securities firms have forecast major declines in domestic corporate profits for the half-year ending Sept. 30, revising earlier predictions of modest gains. Major corporations in Japan will suffer an 11.9 per cent decline in after-tax profits, despite a 13.5 per cent rise in sales, compared to the previous six-month period, says Daiwa Securities. Earlier, ft predicted a 0.3 per cent rise in after-tax earnings and a 16.5 per cent rise in sales. New Japan Securities has changed its earlier forecast for a 2.1 per cent rise in after-tax corporate profits and a 13.2 per cent rise in sales to a 7.4 per cent drop in profits and a 13 per cent rise in sales. Officials of the securities companies say their downward revisions for profits reflect the government's continued tight money policies and rising prices.

A highly qualified person in job orgenization and negotiations repre-senting the Spanish Joint-Venture, office management and account-ing. This person must be able to corry cut all necessary negatio-tions with the client and official state departments of the Libyan

If you consider yourself the man we seek, you must fulfill the following requirements:

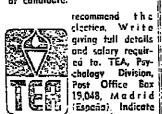

—University degree or similar; —Fluent English, Fluent in Arabic language, spoken and written, least basic knowledge in this language;

-Former experience in business management and contract negatistion;

—Willing to live in Scnahazi (Libya I. Cur offer to the person

we seek: -High responsibility and full contidence in his work along with 2-year contract. -Salary to be erranged depending on capacity, to fulfill posi-

tion and post experience of con--Complete discretion in election of candidate.

ond solary requircd to. TEA, Psychology Division, Post Office Box 19,048, Madrid (Espeña) Indicate oa envelope: Referencia 9381.

lic complex—S.E. Asia

Excellent opportunity to join an expanding International Petroleum company and head up operations for a large LNG plant now in the early stages of construction.

Your primary responsibilities will be the pre-commissioning, start-up and effective operation of the plant. Initially, as part of the management feam, you will assure that the design and construction, plus programs for maintenance, staffing and training, are solidly conceived and carried out from an operations viewpoint. Your qualifications should include 15-20 years experience in major process plants at serior management levels; foreign site experience preferred. A background in cryegenics and large rotating equipment desired.

Excellent compensation package.
Interviews of qualified candidates will be held at our Houston Corporate Office. Virite in confidence, stating your qualifications. Box 4,638, Herald Tribune, Paris
OUR EMPLOYEES KNOW OF THIS AD.

The commence of the second of

Top technical editorial position with American magazine's publisher. You would have over-all responsibility, including some writing, for articles on hi-fi and photo equipment. Rather small office and non-rigid working conditions. Position is in Frankfurt and available immediately.

Box 499, 1877, 6 Frankfurt/M., Gr. Eschenheimerstr. 43. Germany.

DAVIS MANUFACTURING

INTERNATIONAL SALES DEVELOPMENT

Leading manufacturer of trenching machines seeking 3 highly motivated individuals for development of Sales and Dealerships in their assigned areas. Now You Can Secure Future Price Protection for Gasoline and Gasoli

A NEW MEDIUM FOR THE BUYER AND SELLER OF PETROLEUM PRODUCTS . . . AND FOR THE COMMODITY TRADER

Increasing costs of production, political uncertainties, fluctuating interest costs and other variables have created a world-wide need for future price protection by those who produce, transport, refine and use petroleum and refined petroleum products.

Price protection for other products such as silver, copper, lumber, etc. is normally provided through the use of commodity future delivery contracts.

Commodity speculators and traders, reflecting their views through buying and selling of contracts requiring future delivery, are the means of absorbing the risks of price change for both the seller and buyer of the physical commodity.

Telephone: 25-47-53 / Telex: 16102 indx al Kerkstraat 363-Amsterdam

Paktank B.V., the world's largest crude oil and petroleum products storage company, in association with Intercontinental Natural Resources Ltd., and its London affiliate, Dycon Petroleum Trading Ltd., are cooperating with Forward Contract Exchange Company Ltd. in the establishment and operation of a Petroleum Products Division. This division will serve clients in the creation and administration of a market for future delivery contracts relating to gasoline and gasoil.

Send for our brochure, "Gasoline and Gasoil Forward Contracts' which contains detailed information. Fill out and return the coupon below.

Dycon Petroleum Trading Ltd.

4/5 Grosvenor Place—London St/1X 7HF Telephone: 235-0791 / Telex: 918329 Afficied with: Intercontinental natural resources LTD.

To:	Forward Contract Exchange Company Ltd.	
	Kericsiraat 363-Amsterdam	

Gentlemen: Please send me your brochure, "Gasoline and Gasoil Forward Contracts."

I may be interested in ☐ buying ☐ selling ☐ trading 🔲 gasoline futures 🔲 gasoil futures

I am presently 🗆 buying 🗓 selling commercial quantities of 🗋 gasoline 🔲 gasoil 📋 crude oil

The investment firms

Thomson & McKinnon Auchincless Kohlmeyer Inc.

and

W. E. Hutton & Co.

have combined their businesses.

Will it make any difference to any bank, any institutional investor in Éurope?

It will to organizations interested in high quality analysis of investment opportunities in the United States. Our combined, larger institutional research department now provides special expertise in health care, merchandising, cosmetics, food, beverages, photography, broadcasting, paper, containers, publishing. apparel, textiles, petroleum and other energy

sources, besides covering all major industries. Our combining will make a difference to those interested in forecasts of what's going to happen in the American economy. Or in techmical analysis of stock price movements on the New York Stock Exchange and the American Stock Exchange. Or in recommendations for

portfolio strategy with particular regard to American securities. The new, combined firm includes outstanding professionals in each of these fields.

It will make a difference to officers concerned with the execution of orders to buy and sell American securities. By combining, we have more brokers on the floors of the New York Stock Exchange and the American Stock Exchange, More traders experienced in overthe-counter securities. More traders skilled in handling blocks of securities. And more offices through which we can distribute large blocksor seek buyers or sellers of blocks. We're one

of the largest investment firms in the United States with over 100 offices, including nine in

It will make a difference to organizations and their clients interested in any of a number of other investment services, such as options on American stocks or commodity futures trading. Our capabilities have been strengthened in many departments.

To find out how much of a difference our improved facilities can make to you, write, telephone or visit our nearest office. We'll be glad to send you our latest Statement of Financial Condition.

W.E. Hutton International Inc.

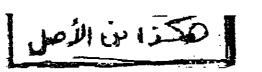

a subsidiary of Thomson & McKinnon Auchincloss Kohlmeyer Inc.

Hembership on the New York Stock Exchange provides just one of our many services.

Announcing 'A Short Course in Silver Investing"

Now in a new 5,000 word report, "A Short Course in Silver Investing," Louis E. Carabini, President of the Pacific Coast Coin Exchange, answers 28 frequently asked questions about investing in silver. Among the questions answered are:

ing to silver?

 How does silver compare with stocks, bonds, and real estate during inflationary periods?

 How would a recession or depression affect the silver market?

- If the government's proposed sale of 117 million ounces of silver took place, what would the effect be? • How well have silver investors done?
- · What are the main avenues for investing in silver, and what are the advantages and disadvantages of each?
- How do I invest in silver coins? • What's the "premium" on a bag of silver coins, and how is it calculated?
- Why are so many investors now turn- Why do different suppliers have different prices?
 - · Can silver be used in a profit-sharing, pension or trust plan? Do you recommend silver as a short-
 - term investment?
 - How much should I invest, in what, and how long should I hold?

Plus: how prices are determined; covering; why maintenance fees are charged; warehouse receipts and so forth. For your FREE copy of "A Short Course in Silver Investing," send the coupon below to Monex International, Gmbh., Holzhausenstrasse 25, 6 Frankfurt am Main, West Germany. Or phone

As with watergate, there is a and flavor have been nearly changer that people may be absent from the concern of plant come bored with pollution and the breeders, that produce is selected deterioration of our diet-borrd to death. Certainly these books, the product of a symposium held by the American Medical Association are not fun reading. Not taminated. that the contributors are alarmists. On the contrary, they are a reassuring cross-section of the agribusiness research establish-ment. But their reassurance can be more alarming than the cries. of our shrillest Cassandras.

Consider the pollution of water and food by the heavy use of nitrogen fertilizer. Dr. Oscar Lorens of the big farm station of the University of California at Davis tells us there is only one recorded case of a child poisoned by nitrate in drinking water and an unspecified number of babies poisoned by high nitrate in spin-ach. But an adult would have to eat 3 pounds of such contaminated spinach at a single sitting to be affected, he says. (Much higher figures on nitrate casualties have been published, incidentally)

While acknowledging that to-day's heavy application of nitrate may not show up in the water tap for a couple of decades. Dr. Lo-renz warms that "if growers areto maintain high yields under all conditions, we will have to be content with some nitrate contamination in the ground waters." He has a simple remedy for cities whose water already exceeds the danger point: "If the permissible level for nitrates were doubled. then certainly many many more waters would qualify as safe." Certainly.

A refrain is "socially acceptable risk." This means we must trade a certain number of deaths against a certain increase in production. In this connection, Dr. William Darby of the Nutrition Foundation denounces the "irra-tionality of the scientist-turned-politicism" for a "McCarthylte" attack on the pesticide industry. Dr. J. M. Coon, a pharmacologist. maintains that the very multiplicity of pesticides and additives may assure that we don't get too much of one, and they may even cancel one another out. Some contributors sound like

the scientists of the tobacco industry. In fact, Dr John Weisof the American Health Foundation speaking of carcinogens in food says: "We must develop a less harmful cigarette." a term coined by Dr. Wynder of the American Health Foundation."

Some other contributors and the editors are less sanguine, and the books are a mine of useful data. What, one may ask, do we get in exchange for the socially acceptable risks"? More production by fewer farmers, certainly. But a study by the Aericulture Department shows a decline in the nutritional quality of the American diet since the war. Other reports stress that nutrition

for rough handling, and gets it. all along the long and costly route · to the consumer's table, by which time it may be valueless and con-

Many participants in the symposium complain how little is known about the vital questions they raise. A century ago, before there were any nutritionists, the educated public well knew the desirability of a balanced diet: green and white vegetables fruit proteins and carbohydrates. It didn't know about vitamins but

its food had them.
Dr. Edwin Crosby of the National Canners Association retoried that fresh produce is a costly source of vitamins, and "the easy, economic route" is to take them in pills. Pobody suggested a logical next step: Skip the pro-cessed foods, and take all our nourishment in pills.

It is curious that, while most contributors were more or less concerned with improving nutri-tion and limiting pollution, only one, Dr. Samuel Epstein of Case Western Reserve University, challenged the notion of "acceptable risk" (with regard to cancer) and none seriously questioned the goels of chemical monoculture and processing.

Is it good for society to suppress the green belts around our cities to eliminate small farming and concentrate production in distant areas? Is it better to have fewer people engaged in growing and handling food and more in packaging, transport and chemistry? In the cliche that summarizes the recommendations of this symposium, like most meetings of its kind, we may reply: More research is needed.

On the diagramed deal from the Spingold final played in New York recently, one of the winners made two tricks more than the rival declarer, playing the same contract after the same opening lead.

The opening bid of one no-

trump Illustrates the growing tendency among experts to take this action when holding a five-card major suit. In the interests of describing the strength and distribution immediately, and of avoiding possible rebid problems, they are willing to run the risk of missing a 5-3 major-suit fit-from time to time.

In this case, the fit was 54, so it was easily located when North used Stayman, His raise to three was invitational, and a more timid player than South might well have pessed, looking at a minimum hand in terms of high cards. A minor suit lead would have

helped the declarer, but West had an automatic lead of the heart queen. When South's teammates were defending, the declarer postponed his diamond decision as long as possible. By cision, he knew that East held. the club ace, so he played for West to have the diamond ace with fatal results.

However, South saw that a favorable dismond situation would allow him to dispose of his potential heart loser. He won the first trick with the heart ace in dummy and immediately led a low diamond. When East ducked and the king won, he led his remaining diamond.

Once the ace was marked in

the East hand declarer had to hope that the queen was in the hand with fewer diamonds. As it was West put up the queen and persevered with hearts. South won and needed entries to dummy. He cashed the spade ace and overtook the queen with the king, noting happily that the opposing trumps were divided two-two.

The diamond jack was now led to ruff out the ace. If West had played low on the second diamond lead, a low diamond move the queen. The spade four was led to the six, and the diamond winner was cashed to dispose of the heart loser. The contract was now safe.

and as Fast held the club ace an overtrick was made. This gained South's team 11 international match points.

Motor Racing Loses a Big Wheel

By Michael Katz

NEW YORK, Aug. 19 (NYT) --Last week at Milwaukee, the Fire-stone Tire & Rubber Co. was required to bring about 200 race tires, at an average cost of \$80 each to a United States Auto Club Championship Trial event, Only 50 tires were used. The rest are now obsolete, \$12,000 worth of rubber to be added to the sport's junk heap.

There have been too many other examples in motor racing of how not to run a business—tire tests that cost \$50,000 a day, the need for about 500 different types of race tires—and Firestone, weary of explaining such iunacies to hungry stockholders, announced that it was withdrawing from its major operations in the sport. Motor racing survived the fuel

220-nounder who led the h 29 homers and 97 RBIs ason stepped into the s Stadium batting cage bly survive the retreat of Fireek and drilled almost 20

Sunday's Line Scores

was not intrinsic to the sport. Pirestone's decision was and is much more serious. It is symptomatic of a condition in racing. If Firestone goes today, there is no assurance that Goodyear won't leave tomorrow. "Costs have skyrocketed in the past few years and there seems to be no end in sight" said A.E. Brubaker, Firestone's vice-president, in explaining the decision

For more than 60 years, Firestone has been one of the major bearers of the high cost of racing Although both Firestone and Goodyear keep their racing bud-gets top secret, probably most of all from stockholders, a recent estimate was that they had spent more than \$40 million in the last decade on the sport. "Ridiculously low," scoffed a Goodyear official, crisis this year and it will proba-Firestone's move to guit USAC

championships (Indianapolis 500, etc.) and formula (grand prix and formula-5000) racing has taken the wheels out from under many teams. For their top clients, the tire companies have supplied more than rubber. Many teams rely on Firestone or Goodyear for financial support through sponsorship. For example, Vel-Parnelli Jones racing team—with Mario Andretti Coleman, Ray (8) and Wockeniuss; Holtzman, Knowles (6), Odom (8), Fin-gers (8), Hamilton (9) and Haney, Te-nace (9), W.-Holtzman (14-18), L.-Co-leman (19-11), HR.-Jankson (23d), Te-nace (19th). and Al Unser the drivers-received about 40 per cent of its income from Firestone. Vel Militech, Jones's partner, said the prize money amounted to no more than -10 per cent "after you take out what we have to give to the drivers and crew members "

What happens to the team now

could say. The team has a con-tract with Firestone through 1977 and, although the company is hoping "to settle outstanding contracts amicably," according to an official, buying contracts will not suffice in this case. The team needs tires, and it doesn't want Goodyears, Militech and Jones are partners in five Pirestone dealerships in the West and have the franchise for Firestone racing tires in 11 states.

Andretti also has two large Firestone dealerships and the thought of having to run on Goodyear tires while trying to sell Firestones is rather disconcerting, "Mario's career is at stake," Militech said, Bob Fletcher, who runs the Cobra team (Jimmy Carruthers, driver) and the largest Firestone dealership in the country, said, "I don't see myself competing with Goodyear all week and then running on their tires Sunday."

Fletcher, Militech and Jones all say, however, they will continue in racing. Firestone is saying "it will" have thres for USAC races next year and Goodyear is promising to take up some of the slack. And all across the sport, officials are "deeply regretting" Firestone's decision and promising to muddle through.

But unless those officials do something to make racing, and in particular the USAC championship series, more inexpensive, Firestone will be just the beginning of a wholesale defection

Guillermo Vilas of Argentina returns a shot to Spain's Manuel Orantes in Canada Open.

NFL Fans Still Averse to Rookies

Football fans, apparently unin-terested in watching rookies, stayed away from the stadiums in large numbers during the week-

In Seattle, which is receiving an NFL expansion franchise in 1976, the St. Louis Cardinals and the San Diego Chargers played before the smallest crowd of the preseason yesterday. Only 5.184 persons watched as the Cards walloped the Chargers, 48-14.

Elsewhere in the NFL, stadiums were generally less than half full. Only Green Bay really impressed with its drawing power. The game between the Packers and the Bears Saturday drew 53.106, by far the best of the exhibition

In other games yesterday, Den-yer beat San Francisco, 10-3, Buffalo defeated Washington, 15-15, and New England beat New Orleans, 7-3.

Bills 16, Redskins 15 John Leypoldt booted a 52-yard

game-winning field goal as the gun sounded to carry the Bills to victory over the Redskins Leypoldt's only successful field goal in three attempts for the night wiped out a 15-13 edge the Redskins had achieved with 1:05 left on Mark Moseley's fifth field goal of the contest,

O. J. Simpson scored a touchdown on a one-yard plunge after pacing the drive with 41 yards Broncos 16, 49ers 3

Rookie Denver Linebacker Randy Gradishar, a No. 1 draft choice from Ohio State, returned an interception 82 yards for a touchdown with 3:52 left in the game to give the Broncos the Cardinals 48, Chargers 14

It took the Cardinals 17 1.2 minutes to get their initial first down, but they went from there to rout the Chargers after being sparked by halfback Terry Metcalf's 76-yard touchdown run in

the second quarter.

Patriots 7, Saints 3 Sam Cunningham capped a 60yard third-period drive with a one-foot dive to give the Patriots a victory over the Saints. Cunningham carried seven times for 49 yards in the touchdown drive. The Saints' only score came at 10:13 of the second period on a 32-yard field goal.

Players Make Offer

WASHINGTON. Aug. 19 (UPI). -The leaders of the National Football League Players Association announced yesterday they are sharply whittling down their

controversial "freedom issue," in a bid to settle the pro football dispute.

They made public a 15-point, one-year package which they would recommend that the members accept if the owners agree to the new proposals.

Ed Garvey, executive director of the NFLPA, said that the union also is reducing its money demands. He said the new offer would allow NFL Commissioner Pete Rozelle to retain full power to deal with problems involving the integrity of pro football but would send disputes between players and clubs to an impartial arbitrator.

The new union offer also withdraws a demand that the "Rozelle rule" be eliminated. The rule permits the commissioner to set compensation which must be paid by a club if it signs a player who has played out his option and become a free agent. Garvey said. "We are com-

promising on every one of the freedom issues." He told a news conference, "This is the limit the bottom limit we can recommend to our members.'

The association's package was presented to the owners at a meeting with federal mediators. but Garvey indicated the owners immediately rejected it. He expressed hope the owners would econsider their position before talks resume again.

The pro football dispute began March 1, when bargaining started. The 42-day-old strike, which began officially July 1. ended to report to training camps.

Vilas Is Titlist At Canadian **Open Tennis**

TORONTO, Aug. 19 (AP).—Guillermo Vilas overpowered Manuel Orantes, 6-4, 6-2, 6-3, to win the men's singles title resterday in the \$130,000 Canadian Open Tennis Tournement. The victory over his doubles partner was worth \$16,000 for

Vilas, who best Orantes with

solid ground strokes from the

Orantes, who won \$8,000 for second, was unable to run with Vilas, who won eight games in row in one stretch. In the third set. Vilas took the first four games while allowing only six points.

Vilas, a 22-year-old native of Mar Del Plata, Argentina, has won three tournaments since the beginning of July. Orantes, a Spaniard, was also runner-up in the 1973 Canadian Open when he lost to Tom Okker.

Vilas, who celebrated his 22d birthday yesterday, defeated a Canadian, Don McCormick: an American, Jeff Borowiak: a Swede, Bjorn Borg, and Okker of the Netherlands to reach the final against Orantes.

He has been the hottest play-er in the world since the Wimbledon tournament, in which be reached the third round. Since then, he has won 29 of 31 matches. In successive weeks, he won the Swiss Open, the Duich Open and was rupper-up to Harold Solomon in the Washington Star-News International. He reached the quarterinals in the U.S. National Clay Courts at Indianapolis, where he lost to Orantes.

Buckeye Tournament

GROVE CITY, Ohio, Aug. 19 UPI).—Raul Ramirez of Mexico scored a 6-3. 6-2 victory over Humphrey Hose of Venezuela yesterday and Roscoe Tanner of the United States defeated courtryman Tom Gorman to advance to the finals of the \$50,000 Buckeye Tennis Championships.

Jipcho Innocent, Kenya Decides

NAIROBI. Aug. 19 (UPI).-The Kenya Amateur Athletics Associa-tion has found track star Ben Jipcho innocent of receiving payments as an amateur.

Jipche, world record-holder for 1,000 - meter steeplechase, earlier this year reportedly told several newspapers and a sports magazine that he made more money as an amateur than after he turned professional. But Jipcho subsequently denied the reports.

The association said last week, "From evidence available, we felt we had no cause to doubt Ben Jipcho's written denial ... have therefore no alternative but nounced a 14-day cooling off to report Jipcho's statement and period and allowed its members attitude, and trust this matter

East Germany Is Dominating Europe Swim Championships

VIENNA, Aug. 19 (UPI) .- East staged a storming finish to over-German swimmers dominated the take toammate Klaus Steinbach in 1:53.1—a European record. setting two world records and winning three of the four gold medals at stake.

The East Germans produced a new star, 14-year-old Carla Linke, who broke the women's 200 meter breaststroke record twice within seven hours. She clocked 2:37.4 in her morning heat and then swam to the gold in 2:34.9, taking almost three seconds off the old record held by 14-year-old teammate Anne-Katrin Schott, who had to settle for the silver. The other world record went

to Kornelia Ender, now 16 and one of the most graceful of the otherwise bulky East German squad. Miss Ender, the world champion in the 100-meter freestyle, broke her own record by 6 10ths of a second with 56.9. Another East German, Angela Franke, was second, and Holland's Enith Brigitha third. East Germany's Roland Matthes

won the 100-meter backstroke, a title which he also holds at world and Olympic levels. He clocked 58.2 seconds to take the gold from countryman Lutz Wanja, with Hungary's Zoltan Verraszato

W. German Winner

The East Germans proved vulnerable only in the men's 200meter freestyle, which went to West German Peter Nocke, who

East German Roger Pyttel the

old record-holder, led after the first 100 meters but a poor turn and lack of stamina pulled him out of the running and Russia's Alexander Samsonov was third. The heats of the men's 100-

meter breaststroke provided a sensation when Britain's David Wilkie, world record-holder at 300 meters and the favorite, stopped two strokes into the race when he thought he heard the klaxon for a false start. It was only the horns of Austrian spectators, however, and Wilkie, realizing his mistake, finished last,

President Gives Congratulations To Golf Partner WETHERSFIELD. Conn., Aug.

19 (AP).-President Ford (clephoned his congratulations to his onetime golf partner. Dave Stockton, after Stockton won the Sammy Davis jr.-Greater Hart-ford Open Golf Tournament yesterday.

Stockton was on his way back to the clubhouse when he was summoned to receive the telephone call.

"Hello, this is Jerry Ford," the call began. Stockton said that the President told him he missed the tournament on television because he himself was out playing goli. He told Stockton that he had birdied five holes. Stockton, who has won three

tournaments this year, played 18 holes as the President's partner two weeks ago in the Pleasant Valley Classic at Sutton, Mass. Stockton said the President is a good golfer who could improve easily if he had the time.

"But I hope he doesn't." Stock-ton said. "I'd rather he be a good President than a good golfer."

Stockton, who led all four rounds of the Hartford event, carded a final-day 69 for a 16under-par 268-four strokes ahead of Ray Floyd,

Another stroke back at 273 was Bob Wynn. PGA champion Les Trevino, unable to can several birdies, finished fourth with 274 after firing a one-over-par 72,

Baseball Chief Says Time for a Black Manager Is Now

By Joseph Durso

commissioner of baseball, says that "now is the time for the major leagues to have a black manager

"We are sorry to see him leave, but I can understand

"I happen to know that several black players have not been considered seriously or fairly in the last several years. Even if the commissioner can't make them hire anybody, he does have certain influence, and I'm using it. We are talking about cities and clubs where it could happen, and about people who could do the job.

Rejects Conspiracy

"It has been suggested that there's a conspiracy or policy against black managers. That's humbug-If there was a conspiracy, I wouldn't stand for it. You can't fust say bias is the reason we haven't had one; competition is more like it. When a club thinks it can win with a black manager, it will name one."

Kuhn declined to speculate on when baseball

that it could happen next season or the season after that, when the American and National Leagues presumably will expand by adding four cities-most likely Washington, Toronto, Seattle and New Orleans. He also did not discourage the notion that pressure might be brought on the prospective owners of the new teams to hire a black manager.

He also refused to deal in names, but he listed several qualities that would help: "He would have to be a man of assurance, a leader, the kind of guy who could work with management and the public as well as with the players."

Others persons in baseball have suggested that those qualities have already been displayed by Bill White, the former first baseman, who now broadcasts for the New York Yankees: Maury Wills, the onetime shortstop, now with the National Broadcasting Co. Larry Doby, the first black player in the American League and a longtune coach; Dave Ricketts, the ex-catcher, now a coach with the St. Louis Cardinals, and Aaron, Robinson and Banks, among others,

Art Buckwald

The Kid-Swappers

WASHINGTON—Nobody likes home Connie was missing, but to talk about it, but there is p lot of kid-swapping going on in the United States. It isn't going On just in the suburbs or the small towns but

in the larger citics as well. I hadn't realizcd how prevalent kid-swapping was until I moved to Washington, One night I came home from the office and, instead of finding dark-haired mv little beauties, I

Buchwald

discovered a 7-year-old-blonde Stranger doing the twist. "Who's she?" I asked my wife. "That's Ann Lindsay. She's ataying here for the night with

Connie." Where's Jennifer?" I asked. "She's sieeping at Priscilla's house because Ann Lindsay's alceping here."

'Who's Priscilla?" "Jennifer didn't know her last hame, but she says she's her best

"That's nice. Where is Joel?" "He's sleeping at his friend's —B.J. He said if Jennifer can aleep somewhere else so can he.

Where does that leave us?" I asked my wife. Well, we had three to start with, we got rid of two for the night, and we gained one. So

we're only short one."

"It saves on food." I agreed 'Not really." my wife said, "We had fish tonight, but Ann Lindsay doesn't like fish, so I had to go out and get her a steak. Then when Connie saw Ann was getting a steak, she wanted one,

wouldn't mind having a steak m; self," I said. "You can't. Somebody's got to

Yugoslav Woman Wins

Norwegian Art Prìze

FREDRIKSTAD, Norway, Aug. 16 APı.—Yugoslav artist Adria-na Maraz has won the 5,000kroner first prize at the 2d International Graphic Biennale here. Second prizes went to Tetsuya

Node of Japan, William Tillyer

of Britain and Wojclech Krzywob-

Jennifer had two friends and Joel

At 8 p.m. I ordered them all to "B.J.'s father lets him watch television until midnight every

night," Joel, who is 9 years old, Is that true, B.J.?" I asked. "Sometimes later," B. J. said

without batting an eye. When I staved at B.J.'s last week," Joel said, "we didn't go to bed until two in the morning." "Well, why don't we just call up your parents and ask them what time you go to bed?" "Oh, you don't have to do

B.J. said hurrledly. "They've probably gone out to a Just then the phone rang. It

was Mrs. Lindsay, who said, What time do you usually put Connie to bed?"

"Eight o'clock." I said. "She said you let her stay up till midnight to watch television. I was a little worried," Mrs. Lindsay seemed relieved.

Later that evening I said to my wife, "We've got to put a halt to this kid-swapping. Everyone on Cleveland Avenue is starting to talk."

Oh, it's harmless," my wite "And they get so much fun out of it." But I knew what I was talking about. A few weeks later I came home and found three kids at the dinner table-none of them mine.

"What happened?" I asked. My cile was rather embarrass-"There's been a dreadful mix-up. Joel invited Francis over to sleen with him, but he forgot he'd accepted an invitation to sleep at Butch's. Jennifer and Connie were invited over to Karen's, but, after they left. Veronica and Mary Elisabeth showed up and said they had been invited over here. I didn't have the heart to send them home. "So now we've got three kids that don't even belong to us,"

"Yes." my wife said, "and guess what? They said their mothers let them stay up until midnight every night to watch television.

In order to permit President Ford an orderly transition of government. Art Buchwald has gone on vacation. He left behind some

Pollution May Help Solve the Hunger Problem

GENT, Belgium (IHT).—Guldo Persoone, professor of biology at the University of Ghent and leader of the state supported Laboratory for Biological Research in Environmental Pollution, can't turn iron into gold. But he believes that he and his research team are approaching a point where they may be able to transform blodynamic wastes (pig manure) into oysters. North Sea shrimp and sole.

"I'm sure your readers know," said Prof. Persoone, "that two major threats to man's existence today are (1) environmental pollution and (2) a global shortage of foodstuffs. When distant early warning signals went up a generation ago, they were generally ignored, even by reputable scientists. The problem can't be brushed off any more and we realize now that the two menaces-pollution and hunger-are inter-

"Some 8.000 to 10,000 years ago," he continued, "our ancestors started to cultivate the land, trying to guide the growth of vegetable nourishment needed by ourselves and domestic animal species on which we fed, and still feed. The development of agriculture, changing a hunting and gathering economy into premeditated ar i somewhat controlled food production, was a major revolution in the history and prehistory of Homo saviens."

Today. Prof. Persoone believes, man stands on the threshold of a revolution of similar significance: The development aquaculture, or more specifically, mariculture. Present-day food production methods, he believes, are too primitive to stand chance to meet the requirements of a world with mushrooming population figures. By carefully controlled biological recycling processes, the professor believes, blight can be turned into benefit for man and his biosphere. Funded by the Belgian Min-istry of Public Health and working in close cooperation with G.P. Voets, head

of the university's biochemical-microbiological research group, the Persoone team has passed two major hurdles on the road toward their goal: They have managed to turn literal dirt into delicious by bring shripp standards; green algae. The brine shrimp thrive, grow and reproduce on a diet like that, themselves providing tasty morsels for larger marine species, generally considered Sunday food in the best human families.

"The government came in," said Prof. Persoone, "when we had been working for a few years on the algae experiments. They wondered if we could help them to get rid of the pig droppings that amass in our 11,779 square miles. We are heavy producers and consumers of pork products There are as many pigs as people in our

"We could dump the manure into the nearest watercourse." said the professor. "An immediate result would probably be

CLASSIFIED

Prof. Guido Persoone ... two menaces.

an immense growth of green algae, providing food for zooplankton and marine larvae. But the hiological processes would be completely out of our hands. The balance of nature swings within preciously

narrow margins."

Prof. Persoone and his team decided to start at the bottom end of the maritime food chain, by raising green algae in the available nutrient salt solutions. Algae are microscopic aquatic plants, able to use photosynthetic processes to grow and reproduce on sunlight and absorbed minerals. The Persoone team experimented with a number of species of green algae. Most responsive, it turned out, was a phytoflag-

ellate. Dunaliella viridis. "It had been done before but never on a large scale under really controlled laboratory conditions." Numerous factors, the scientists learned, play important parts, such as temperature and water turbulence. light conditions, the presence of oxygenand the concentration of nutrient salts.

"It is one thing to do it on a limited scale, for strictly scientific ends, Raising algae on an economically sound industrial level from a basis of light and biodynamic wastes, is a somewhat different proposition. We believe we have found a way, raising the microscopic plants in large aerated vertical plastic tubes, constantly lit by fluorescent tubes, with a bottom structure that eliminates the settlement of bacterial sedimentation. The rates of growth and reproduction, under optimal conditions, are impressive: 0.2 to 7 million cells a milliliter in 12 days. Algae contain about 50 to 60 per cent protein, dried weight, along with a number of vitamins in the B complex."

Green algae are base foods for most

are ingested with gusto by small crustace-ans, mollusks and various fish larvae. They are equally palatable, it appears, whether served live, frozen or dried. The taste, color and consistency of dried algae may resemble vaguely that of dried, finaly chop-

ped spinsch, to a noncrustacean. "Each chain in the food link represents a fearful waste," said Prof. Persoone. "We can economize by limiting the links to a minimum. We have started, with excellent results, to feed dried algae directly to brine shrimos (Artemia salina)."

The Ghent team reports a growth rate of the Artemia from microscopic size to 5 to 6 millimeters in eight days. The mortality rate has been held at less than 10 per cent. Plans are under way to change the main production line from 30-liter containers to tubes holding 500 liters.

"With that system," said Prof. Persoone, we'll be able to harvest 750,000 adult brine shrimp from each container, every 10 days, even if we are only 50 per cent successful The brine shrimp, in addition to its attractive food qualities, has another most interesting capacity: Its eggs (which may have developed up to the gastrula stage; are able to encyst themselves and survive prolonged periods of drought in a state of suspended animation. Immersed again in a properly oxidized saline solution, the cysts will come to life again.

"A major problem in aquaculture," the professor continued, "has been to find live food for cultivated marine species. The brine shrimp seem to fill the order. A lot of laboratory work has gone into the cultivation of them in the past few years, and I believe that our methodology has been most successful in this field, too."

Prof. Persoone and his research group plan to move on next year to practical tests of their theories in the 36 hectare Spuikom saltwater enclosure, near Ostend The Spuikom, originally a part of Belgium's vast inland waterway system, has for years been used, commercial raising of "Ostend

"A spawning oyster," said Prof. Persoone, "lets off some 300,000 larvae. Under natural conditions, six of them may survive beyond the larval stage. Under controlled maricultural conditions with few predators present and plenty of food, we believe we can raise that figure to 50 or 60. The same, we believe, will hold true for the North Sea shrimp and the common sole, Solea solea.

"We have barely gotten our feet wet yet," the professor added. "It may be an-other 25 years before mariculture will come into its own, providing some 25 to 50 per cent of the fish protein needed by man and some 10 per cent of his total nutritional needs. We biologists, in Ghent and elsewhere, have demonstrated that we have viable techniques within reach. It is time for the economists to move in and consider their end of the job."

Swiss watchmakers developed the quartz watch in order to improve still further the precision for which their timepieces had long been justly famed. Today, a high quality quartz watch like that made by Ghrant-Perreganz of La Chaux-de-Fonds, Switzerland, is accurate to within about 1 minute a year.

Besides replacing most of an ordinally movement's numerous parts.

Piezes sand me detailed information on quartz watches
